Imtihon tartibi

1. **Reading & Writing Module 1** — 27 savol, 32 daqiqa. Vaqt tugagach to'xtang.
2. **Reading & Writing Module 2** — 27 savol, 32 daqiqa.
3. **Math Module 1** — 22 savol, 35 daqiqa. **Math Module 2** — 22 savol, 35 daqiqa. R&W va Math orasida 10 daqiqa tanaffus. Desmos kalkulyatoridan foydalanish mumkin.
4. **JAVOB** katakchasi turgan Math savolida variant yo'q — javobni o'zingiz yozasiz.
5. **Javobga hamma modulni tugatgandan keyin qarang.**
6. **Xato qilgan savolni Xatolar daftariga yozing** va uch kundan keyin qayta yeching.

Har bir R&W modul — real SAT tartibida

Craft & Structure (Words in Context, Text Structure, Cross-Text) → **Information & Ideas** (Central Ideas, Command of Evidence, Inferences) → **Standard English Conventions** → **Expression of Ideas** (Transitions, Rhetorical Synthesis).

Math modullari Algebra, Advanced Math, Problem Solving & Data Analysis va Geometry & Trigonometry savollaridan iborat; savollar osondan qiyinga qarab joylashgan.

2 Reading & Writing — Module 1

27 ta savol · 32 daqiqa

1. When building outdoor structures like decks or fences, carpenters must carefully _____ lumber options, selecting naturally rot-resistant woods like cedar or pressure-treated pine that can withstand moisture exposure, as conventional untreated wood would quickly deteriorate when subjected to rain, humidity, and ground contact.

Which choice completes the text with the most logical and precise word or phrase?

- (A) offset
- (B) evaluate
- (C) conceal
- (D) sustain

2. Though most hoaxes perpetrated as jokes by mischievous users of Wikipedia, an online encyclopedia that almost anyone can freely edit, have quickly been detected and removed, a few fictitious entries, such as those for the American new wave band Transformatix and the 19th-century German poet Emilia Dering, persisted on the site for many years before they were finally recognized as _____ and deleted.

Which choice completes the text with the most logical and precise word or phrase?

- (A) revelations
- (B) analyses
- (C) enhancements
- (D) pranks

3. A variety of technologies make use of magnets incorporating rare earth elements, such as gadolinium. For technology manufacturers, dependence on rare earth elements is a significant _____: such elements are extracted at large scale in only a small number of locations, making any supply chain requiring them highly fragile.

Which choice completes the text with the most logical and precise word or phrase?

- (A) redundancy
- (B) discrepancy
- (C) vulnerability
- (D) insolvency

4. Although it would be overstating the case to characterize the effects of oil shocks—such as the 57% rise in oil prices from May 1979 to January 1980—as merely _____ Gbadebo Oladosu et al. have shown that the effects of oil shocks on gross domestic product (GDP) can be fairly modest. In India, for instance, recent oil shocks exerted only a slightly negative effect on GDP.

Which choice completes the text with the most logical and precise word or phrase?

- (A) nominal,
- (B) idiosyncratic,
- (C) derivative,
- (D) detrimental,

5. Human eyes contain cone cells that help process color and bright light. There are three types of cones: long, medium, and short. In a study, James Fong and his team used a laser technology to activate only the medium cones in participants' eyes. When they did this, the participants saw a new blue-green color that the researchers then named olio.

Which choice best describes the overall structure of the text?

- (A) It discusses some characteristics of cones in human eyes and then discusses a study involving those cones.
- (B) It mentions three different colors and then mentions the wavelengths associated with those colors.
- (C) It names different cells in human eyes and then states how they work with cells in a different part of the body.
- (D) It explains what the color olio is and then explains how that color was discovered.

6. Though previous studies, including work by Jacobsen et al. (2005), have documented that wood density correlates negatively with resistance to water stress in angiosperm taxa, Trueba et al. (2017) observed no such associations among New Caledonian woody angiosperms. Trueba et al. noted that while several earlier studies included a variety of habitats—wet and dry forests, savannas—and thus comprised plants with a wide range of functional trait values, the New Caledonian investigation was restricted to rainforest taxa occupying climatically similar habitats, resulting in constrained ranges of such values.

Which choice best states the main purpose of the text?

- (A) To indicate that wood density and water-stress resistance correlations in angiosperms vary significantly depending on the geographic region and climate conditions studied
- (B) To explain the apparent absence of a previously observed association between two functional traits in angiosperm species sampled from an ecologically homogeneous set of habitats
- (C) To describe a study whose results demonstrate that a known relationship between two functional traits in angiosperms cannot be observed when sampling is restricted to homogeneous habitats
- (D) To clarify why a geographically restricted study invalidated the finding that angiosperm species exhibit a trade-off between wood density and water-stress resistance

7. **Text 1**

Isaac Asimov, author of *Nemesis* and *The End of Eternity*, is highly regarded despite his mediocre writing style. His prose is workmanlike; his characters are flat and discuss ideas rather than emotions. That his work is enjoyable despite this is a testament to his prodigious imagination—even if people read his books only for the ideas, they will have plenty to consider.

Text 2

Asimov is critiqued for his style, but it is wrong to fault a writer for failing to do what he never intended to do. For example, although most of his novel *Foundation* consists of people discussing science and politics and we find out little about his characters' lives, Asimov wanted to convey the vast sweep of human history over centuries, and one of his points is that at such a timescale, individuals don't matter. Thus his lack of characterization is central to Asimov's thematic aims.

Based on the texts, how would the author of Text 2 most likely respond to the evaluation of Asimov's writing style in the underlined claim in Text 1?

- (A) By arguing that Asimov's writing style should be judged against the styles of historians rather than those of fiction writers
- (B) By pointing out that the flatness of Asimov's characters is a feature of *Nemesis* and *The End of Eternity* but not of *Foundation*
- (C) By agreeing that Asimov's prose is flawed but disagreeing about the quality of his characters

(D) By asserting that Asimov’s minimal characterization is likely a conscious choice that helps him convey an important idea

8. While not everyone notices it, beneath the tree canopy of an ordinary city park lies an extraordinary web of life—fungus breaking down fallen leaves, native bees pollinating wildflowers, and moss growing in the crevices of an old log. To document this hidden biodiversity, everyday people have been participating in “bioblitz” events, in which participants photograph, collect, and identify species using both field guides and mobile apps. These collective observations reveal which plant and animal species depend on one another for survival—ecological relationships that might otherwise remain unseen.

In context, the text’s characterization of the biodiversity in city parks as “hidden” most clearly conveys which idea?

- (A) The environmental interactions in city parks are abundant but occur primarily during nighttime hours when human visitors are absent.
- (B) Some wildlife species that populate city parks have developed sophisticated camouflage techniques that minimize their visibility.
- (C) The ecological relationships in city parks may not be readily apparent without systematic observation and documentation efforts.
- (D) There are many beautiful parks in cities, but they often remain unseen because of poor urban planning decisions.

9. Asia’s Gobi Desert and California’s Central Valley are the main sources of dust in western North America’s Sierra Nevada mountains. To investigate their relative contributions, Sarah Aciego et al. collected and recorded the isotopic signatures of dust collected at a low-elevation site (the San Joaquin Experimental Range) and two higher elevation sites (Providence and Soaproot) in the Sierra Nevada, as well as the isotopic signatures of Gobi and Central Valley dust. Aciego et al. concluded that while the contribution of Central Valley dust, which has a lower ratio of strontium-87 to strontium-86 ($^{87}\text{Sr}/^{86}\text{Sr}$) than Asian dust does, remained mostly unchanged at the lowest-elevation site for the duration of the study, the contribution of Central Valley dust increased at the higher elevations.

Which choice best reflects the researchers’ conclusions?

- (A) Over the course of the study, the $^{87}\text{Sr}/^{86}\text{Sr}$ ratio of dust collected at the San Joaquin Experimental Range was relatively constant, whereas the $^{87}\text{Sr}/^{86}\text{Sr}$ ratios of dust collected at Providence and Soaproot decreased.
- (B) As the study went on, the $^{87}\text{Sr}/^{86}\text{Sr}$ ratios of dust collected at Providence and Soaproot grew closer to the $^{87}\text{Sr}/^{86}\text{Sr}$ ratio of dust from Asia, whereas the $^{87}\text{Sr}/^{86}\text{Sr}$ ratio of dust collected at the San Joaquin Experimental Range grew closer to that of dust from the Central Valley.
- (C) Throughout the study, the $^{87}\text{Sr}/^{86}\text{Sr}$ ratio of dust collected at the San Joaquin Experimental Range was consistently higher than the $^{87}\text{Sr}/^{86}\text{Sr}$ ratios of dust collected at Providence and Soaproot.
- (D) By the end of the study, the $^{87}\text{Sr}/^{86}\text{Sr}$ ratios of dust collected at Providence and the San Joaquin Experimental Range had become very similar, whereas the ratio of dust collected at Soaproot had not.

10. A student is writing a research paper on the history of irrigation in the southwestern United States, situating the development of the Salt Spring Valley Reservoir (a man-made body of water created in Calaveras County, California, in 1882) in a larger historical context. The student claims that some modern-day irrigation methods used in southwestern states, such as California, Arizona, and New Mexico, have a lineage that long predates the completion of the Salt Spring Valley Reservoir.

Which quotation from a historian best supports the student’s claim?

- (A) “In the decades following the Second World War, irrigation of arid areas for agriculture increased to such a degree that it now accounts for roughly 70% of the world’s water usage.”
- (B) “The importance of the development of irrigation infrastructure in the American Southwest today cannot be overstated, since it is the most common means of conveying water for food production.”
- (C) “The irrigation system developed by the Hohokam people in what is now central Arizona in the 7th century CE was simple but made use of hydraulic engineering design principles that are still utilized by today’s engineers.”
- (D) “Sprinkler irrigation systems, which were developed in the late 20th century, are a convenient technique of irrigating that makes use of machinery in order to spray water in all directions. Many areas of the Southwestern United States are currently irrigated by this method.”

11. Most bird species that are capable of flight weigh less than a kilogram (kg), which is not surprising considering the burden that extra body weight puts on a flying animal. But not all flying birds are so light, as we can see most clearly in the example of the _____.

Common name	Average mass (kg)	Capable of flight?
Dwarf cassowary	19.7	No
Somali ostrich	41.0	No
Mute swan	11.9	Yes
Andean condor	11.3	Yes

Which choice most effectively uses data from the table to complete the example?

- (A) mute swan, which has an average mass of 11.9 kg.
- (B) Somali ostrich, which has a higher average mass than the dwarf cassowary.
- (C) Somali ostrich, which has an average mass of 90.0 kg.
- (D) Andean condor, which has an average mass below 10 kg.
12. A small coffee shop is installing window film to create a more comfortable indoor atmosphere. This is because in the morning, the sun comes through the front windows and makes it too bright for people reading or using laptops. The coffee shop owner wants to reduce the glare in the morning but still keep the shop looking sunny and welcoming. To help meet these goals, a window-film technician recommends selecting a film that reduces glare as much as possible while still allowing more than 15% of visible light to pass through the windows. The table shows the performance data for several different films.

Film name	Visible light allowed through	Glare reduction
No film used	90%	14%
VisionGlow	35%	54%
ToneView	23%	64%
CrystalShine	18%	71%
GoldBlock	6%	81%

Based on the window-film technician’s recommendation and the data in the table, which film should the coffee shop owner choose?

- (A) VisionGlow
- (B) CrystalShine

- (C) GoldBlock
- (D) ToneView

13. Louis-Ferdinand Céline’s 1932 novel *Journey to the End of the Night* is regularly described as autobiographical. That characterization is apt—there are many parallels between the experiences of the novel’s protagonist, Ferdinand Bardamu, and those of Céline—but it should not be taken to mean that every person or event depicted in *Journey to the End of the Night* has a real-life analogue. Much of the novel is pure invention, and readers who neglect this fact and instead focus excessively on correspondences between the novel and Céline’s life can thus _____.

Which choice most logically completes the text?

- (A) overemphasize the extent to which Céline took inspiration from earlier writers.
 - (B) fail to appreciate how much creativity Céline shows in the book.
 - (C) refuse to acknowledge that Céline drew on real-world material when writing *Journey to the End of the Night*.
 - (D) misrepresent *Journey to the End of the Night* as being more widely read than it actually is.
14. In 1967, archaeologist James Mellaart claimed that at its peak, Çatalhöyük—a 33-acre Neolithic village in present-day Turkey that dates from approximately 7100 to 5950 BCE—housed between 8,000 to 10,000 residents, an estimate based on the excavation of dense clusters of mud brick buildings that were thought to have been dwellings. Arguing that such estimates should be reevaluated, Ian Kuijt and Arkadiusz Marciniak (2024) cite radiocarbon data and ethnographic modeling that suggest the heterogeneity of building use in Çatalhöyük, with many individual buildings being inhabited for relatively brief periods—20 to 30 years or less—before being abandoned or repurposed for nonresidential functions (e.g., storage). Accordingly, these recent findings challenge the assumption that _____.

Which choice most logically completes the text?

- (A) the buildings excavated at Çatalhöyük at the time of Mellaart’s research had served a residential purpose as early as 7100 BCE.
 - (B) the density of excavated buildings at Çatalhöyük can serve as a proxy for how many people inhabited the village at a given time.
 - (C) the use of mud bricks is a reliable indicator that a structure had been used either as a dwelling or for nonresidential purposes.
 - (D) the number of buildings at Çatalhöyük would have been sufficient to accommodate a population that expanded from 8,000 to 10,000 inhabitants by 5950 BCE.
15. An accomplished birder might be able to spot thousands of different species over the course of a career, from *Treron sphenurus* to *Lanius ludovicianus*, but no birder has ever achieved the ultimate _____ an in-person glimpse of all 10,000-plus species of birds.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) goal: catching
- (B) goal, catching
- (C) goal; catching
- (D) goal. Catching

16. On entering the produce section of the grocery store, the performer _____ not just the general scent of fruit but the distinct olfactory nuances of lemon (*Citrus limon*), camu camu (*Myrciaria dubia*), and hawthorn (*Crataegus rhipidophylla*).

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) distinguished
- (B) distinguishing
- (C) distinguish
- (D) to distinguish

17. South Carolina resident Alonzo J. Ransier, sworn in as a member of the US House of Representatives in 1873, was one of the nearly two thousand African _____ during the decade following the Civil War.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) Americans' who won elections'
- (B) Americans who won elections
- (C) American's who won elections
- (D) Americans who won election's

18. Topographical prominence is a measure of a mountain's independence from other mountains. Having 13,199 feet of prominence, _____.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) geographers have ranked Mount Rainier, a peak in the United States, as the world's 21st most prominent mountain.
- (B) the list of mountains geographers rank as the world's most prominent includes Mount Rainier, a peak located in the United States, at number 21.
- (C) Mount Rainier, a peak located in the United States, is ranked by geographers as the world's 21st most prominent mountain.
- (D) the ranking given by geographers to Mount Rainier, a peak located in the United States, is 21st most prominent mountain in the world.

19. To experience both the multi-instrument groove of contemporary blues music and the stripped-down Delta blues of Houston Stackhouse and other blues forebearers _____ the rich history of the genre.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) is to realize
- (B) are realizing
- (C) realizing
- (D) to realize

20. Represented most commonly by a double vertical bar (||) or double oblique lines (//), _____ function as a deliberate break in the flow of poetry or music.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) the name comes from the Latin word for "cutting," and the caesura's etymology reflects its
- (B) the Latin word for "cutting" gives the caesura its name, an etymology that reflects the caesura's

- (C) the caesura gets its name from the Latin word for “cutting,” an etymology that reflects its
- (D) the etymology of the term “caesura” comes from the Latin word for “cutting,” reflecting its

21. The *Dave Dashaway* book series was among the many children’s series that were published during the first half of the twentieth century. _____ the *Dave Dashaway* books were published from 1913 to 1915.

Which choice completes the text with the most logical transition?

- (A) To be exact,
- (B) Finally,
- (C) Nevertheless,
- (D) By contrast,

22. Meteorologists use various specialized tools to measure atmospheric conditions. _____ barometers detect changes in air pressure that often signal approaching weather systems, while anemometers measure wind speed and direction.

Which choice completes the text with the most logical transition?

- (A) For instance,
- (B) Similarly,
- (C) Next,
- (D) As a result,

23. In 1965, Morrie Turner’s comic strip *Wee Pals* became the first serial comic by a Black cartoonist to be syndicated, appearing in papers nationwide. _____ many other strips by Black cartoonists were syndicated, including Barbara Brandon-Croft’s *Where I’m Coming From* in 1991 and Jerry Craft’s *Mama’s Boyz* in 1995.

Which choice completes the text with the most logical transition?

- (A) For example,
- (B) That is,
- (C) Later,
- (D) Previously,

24. Massimo Coli and colleagues used ground-penetrating radar (GPR) to map moisture infiltration within the walls of the Basilica di Santa Croce in Florence, Italy. The contrast between wet and dry materials produces vivid radar echoes that delineate leak pathways, yet the presence of water-saturated zones also hampers the efficacy of the technique. _____ even as GPR makes such areas conspicuous, water within masonry absorbs and scatters radar energy, often obscuring defects in layers beyond the saturated region.

Which choice completes the text with the most logical transition?

- (A) Indeed,
- (B) Thus,
- (C) Likewise,
- (D) Nevertheless,

25. While researching a topic, a student has taken the following notes:

- The French Republican calendar replaced the Gregorian calendar in France from 1793 to 1805.
- Both calendars are divided into twelve months.
- The timelines for the months don't match.
- The seventh month of the French Republican calendar, Germinal, begins during March, the third month of the Gregorian calendar.
- The twelfth month of the French Republican calendar, Fructidor, begins during August, the eighth month of the Gregorian calendar.

The student wants to emphasize a difference between the French Republican and Gregorian calendars. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- (A) The French Republican calendar, which replaced the Gregorian calendar in France from 1793 to 1805, has twelve months, including the months of Germinal and Fructidor.
- (B) The timelines for the months of the two calendars don't match; for example, the seventh month of the French Republican calendar begins during the third month of the Gregorian calendar.
- (C) Used in France from 1793 to 1805, the French Republican calendar includes the months of Germinal and Fructidor (the seventh and twelfth months of the year).
- (D) The third and eighth months of the Gregorian calendar are March and August, respectively.

26. While researching a topic, a student has taken the following notes:

- A copyright prevents a book's contents from being reproduced (published) without permission from the copyright holder.
- When a book's copyright expires, the book enters the public domain and can be legally reproduced by anyone.
- *Harmonium* is a poetry collection by Wallace Stevens.
- It entered the public domain in 2019.
- *The Secret of Chimneys* is a novel by Agatha Christie.
- It entered the public domain in 2021.

The student wants to emphasize a similarity between Wallace Stevens and Agatha Christie. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- (A) *Harmonium*, a poetry collection by Wallace Stevens, entered the public domain in 2019, unlike Agatha Christie's novel *The Secret of Chimneys*.
- (B) The year was 2021, and the copyright to Agatha Christie's *The Secret of Chimneys* had finally expired.
- (C) Both *Harmonium* and *The Secret of Chimneys* are in the public domain; however, one is a poetry collection and the other a novel.
- (D) Wallace Stevens and Agatha Christie are two authors whose works recently entered the public domain.

27. While researching a topic, a student has taken the following notes:

- Merle Oberon (1911–1979) was an actress born in Mumbai (then known as Bombay), India.
- She was of Indian, Maori, and Irish heritage.
- She was the first Indian-born actress to be nominated for an Academy Award.
- Early in her career, she played many nameless, uncredited roles, such as her role in *The Three Passions* (1928).
- Later, she played many named, credited roles, such as Marjorie Ismay in *Forever and a Day* (1943).

Which choice most effectively uses information from the given sentences to specify Merle Oberon's role in *Forever and a Day* (1943)?

- (A) Merle Oberon's story begins in Mumbai (then known as Bombay), India, in 1911.
- (B) In 1943, Indian-born actress Merle Oberon played the role of Marjorie Ismay in the film *Forever and a Day*.
- (C) Though she would go on to receive credit in many films, Merle Oberon started her career playing uncredited, nameless roles in films such as *The Three Passions* (1928).
- (D) Merle Oberon was an Indian-born actress who performed in many films, including *The Three Passions* (1928) and *Forever and a Day* (1943).

3 Reading & Writing — Module 2

27 ta savol · 32 daqiqa

1. Blue holes, such as Dean’s Blue Hole and the Tar Side Blue Hole, are deep sinkholes that form underwater. Because the dark blue appearance of their waters means these pits can be easily _____ shallow areas around them, where the water looks light blue, many blue holes have been discovered by people doing recreational activities like boating.

Which choice completes the text with the most logical and precise word or phrase?

- (A) surpassed by
- (B) elevated from
- (C) differentiated from
- (D) explored by

2. The longevity of heating and cooling systems depends significantly on technicians properly _____ refrigerant lines during installation. If non-condensable gases, moisture, and microscopic debris aren’t purged from the lines, vital components can be damaged during use, leading to total system failure.

Which choice completes the text with the most logical and precise word or phrase?

- (A) bracing
- (B) designating
- (C) evacuating
- (D) detangling

3. Despite the marked divergence of such ballads as “The House Carpenter” from their antecedents in Britain, the balladry of the Appalachian South long figured as a proxy for the music naturalized there in the colonial era. More recent scholarship offers a _____ directly acknowledging Appalachian innovations to British ballads as well as the influence of spirituals sung in Black churches in the South.

Which choice completes the text with the most logical and precise word or phrase?

- (A) recapitulation:
- (B) corollary:
- (C) corrective:
- (D) hypothesis:

4. Forward-thinking plumbing design _____ the possibility that a building’s needs will change over time in unpredictable ways. This foresight manifests in oversized main lines, accessible junction points, and strategically placed valves that will allow future modifications without requiring walls and foundations to be extensively opened.

Which choice completes the text with the most logical and precise word or phrase?

- (A) substantiates
- (B) quantifies
- (C) accommodates
- (D) transcends

5. Before refrigeration, food was preserved using salt, smoking, or ice harvested from frozen lakes. The invention of the electric refrigerator changed how some people stored and preserved their food. In some countries, this new technology became more commonly available in homes during the 1920s and 1930s. People in these places were now able to keep food cold and fresh for extended periods. As a result, they were able to shop for certain foods and drinks less frequently.

Which choice best states the main purpose of the text?

- (A) To describe the health benefits of storing food at the correct temperatures over long periods of time
 - (B) To discuss how the invention of the refrigerator changed people's food storage and shopping habits
 - (C) To explain the science behind keeping different foods preserved with and without refrigeration
 - (D) To convince readers that modern conveniences such as refrigeration have led to a loss of critical skills
6. In *The Jazz Continuum*, LaTasha Barnes, Quynn Johnson, and other dancers seamlessly interweave recent dance styles, including breaking and waacking, with elements of the Lindy Hop, a popular swing dance of the 1930s with roots in the Black American community of Harlem, New York. Inspired by Barnes's curiosity about the similarities between the Lindy Hop and these seemingly unrelated dance styles, the show's choreography makes visible how intertwined their histories actually are. The show is therefore a testament to the Lindy Hop's enduring influence on American culture.

Which choice best states the function of the underlined portion in the text as a whole?

- (A) It addresses the reasons why the historical connections between the dance styles mentioned earlier in the text have been generally overlooked.
- (B) It provides evidence for the text's claim that the Lindy Hop has had a greater cultural impact than the other dances featured in *The Jazz Continuum* have had.
- (C) It identifies the specific ways in which the Lindy Hop is similar to the contemporary dance styles discussed in the text.
- (D) It identifies the motivation for *The Jazz Continuum*'s choreographic approach that is described earlier in the text.

7. **Text 1**

In parts of New Zealand, the stoat is a major predator of the house mouse. Researcher G.L. Blackwell and colleagues found that when this predation pressure on house mice was temporarily reduced, their numbers significantly increased. This finding illustrates a foundational ecological principle: predators control prey population numbers.

Text 2

François Potvin and colleagues found that excluding wolves from a site in Quebec, Canada, where they typically prey on white-tailed deer had no significant effect on white-tailed deer abundance. Many other predation-reduction studies show an increase in prey abundance, but those studies often focus on small, rapidly reproducing prey, like birds, mice, and frogs, rather than large, slowly reproducing prey, like white-tailed deer, which could account for the difference between these results and Potvin and colleagues' results.

Based on the texts, the author of Text 2 would most likely agree with which statement about the "principle" mentioned in Text 1?

- (A) It has been challenged by some studies, but the findings of those studies have not been widely accepted.
- (B) It is plausible, but many of the studies that support it have methodological flaws.

- (C) It has some evidential support, but it should not be regarded as universally applicable.
- (D) It may be true for some predators but only because those predators share certain physical characteristics.

8. The following text is adapted from Lady Gregory’s 1904 play *Spreading the News*. Jack Smith and Bartley Fallon have encountered each other at the local fair.

JACK: It isn’t to the fair I came myself, but up to the Five Acre Meadow I’m going, where I have a contract for the hay. We’ll get a share of it into tramps [drying stacks] to-day.

BARTLEY: You will not get it into tramps to-day. The rain will be down on it by evening, and on myself too. It’s seldom I ever started on a journey but the rain would come down on me before I’d find any place of shelter.

JACK: If it didn’t itself, Bartley, it is my belief you would carry a leaky pail on your head in place of a hat, that way you’d not be without some cause of complaining.

Based on the text, what does Jack most likely believe about Bartley?

- (A) Bartley and Jack will be better able to cut the hay if they work together.
 - (B) Bartley will find fault with any situation.
 - (C) Bartley is a poor judge of the weather.
 - (D) Bartley is concerned that Jack hasn’t prepared for the weather.
9. New York-based artist Uman is no stranger to crossing borders: born in Somalia, she lived in Kenya and Denmark before moving to the United States. Her art, too, straddles multiple boundaries. Drawing on knowledge of everything from East African fabrics to Arabic calligraphy, Uman’s kaleidoscopic paintings often combine abstract shapes with anthropomorphic elements, like eyes, mouths, and gestures. Moreover, she seeks to cultivate a practice of “constant evolution”—unaltered from any prescriptive agenda, so that her art navigates a liminal space between tradition and autobiography, community and itinerancy, and activism and contemplation.

Which statement about Uman’s art is most strongly supported by the text?

- (A) Its spontaneity makes it challenging for critics to recognize the conventions of genre that Uman chooses to observe.
 - (B) Its rejection of established aesthetic criteria can be traced to Uman’s ambivalence toward cultural traditions.
 - (C) Its adherence to certain dichotomies sets it apart from the work of most abstract artists based in the United States.
 - (D) Its openness to experimentation is evident in its diverse influences and refusal to adhere to a single conceptual frame.
10. *Claudine at School* is a 1900 novel by Colette, originally written in French. The narrator is a fifteen-year-old girl living in a small, rural town. She presents herself as having a strong emotional attachment to the surrounding forests: _____.

*Which quotation from a translation of *Claudine at School* most effectively illustrates the claim?*

- (A) “Green meadows make rifts in [the woods] here and there, so do little patches of cultivation. But these do not amount to much, for the magnificent woods devour everything. As a result, this lovely region is astoundingly poor and its few scattered farms provide just the requisite number of red roofs to set off the velvety green of the woods.”
- (B) “And then there are my favourites, the great woods that are sixteen and twenty years old. It makes my heart bleed to see one of those cut down.”

- (C) “Under the firs, you light a fire, even in summer, because it’s forbidden; you cook any old thing, an apple, a pea, a potato stolen from a field, some wheaten bread if you’ve nothing better.”
- (D) “My name is Claudine, I live in Montigny; I was born there in 1884; I shall probably not die there.”

11. In an extensive review of existing literature, Léna de Framond and team cataloged the prevalence of broken-wing display—a defensive behavior observed in *Haematopus palliatus* (American oystercatcher) and many other species—throughout the Aves class. Documentation of the display in 285 species across 52 families suggests the behavior likely evolved independently multiple times, prompting the team to consider ecological and life-history characteristics with hypothesized associations to the behavior’s emergence, including traits related to reproduction investment and future reproduction potential. Based on their review of those traits, the team concluded that _____.

Scientific name	Common name	Broken-wing display?	Incubation (days)	Parental incubators
<i>Setophaga caeruleus</i>	black-throated blue warbler	Yes	13	1 parent
<i>Tetrastes sewerzowi</i>	Chinese grouse	No	29	1 parent
<i>Haematopus ostralegus</i>	Eurasian oystercatcher	No	28	2 parents
<i>Zenaida macroura</i>	mourning dove	Yes	15	2 parents

Which choice most effectively uses data from the table to complete the conclusion?

- (A) broken-wing display is most often observed in species with less opportunity to reproduce in a year due to longer incubation periods.
- (B) incubation duration and capacity for multiple broods are more strongly associated with the use of broken-wing display than the number of parental incubators is.
- (C) capacity for multiple broods, number of parental incubators, and incubation duration are equally associated with the use of broken-wing display.
- (D) among species with more than one parental incubator, the use of broken-wing display is associated with greater incubation duration.
12. A study of commercial airline routes that carried the greatest number of passengers in 2017 and 2018 shows that, in general, domestic routes (routes within a single country) carried many more passengers than international routes. However, a few international routes were so popular that they carried more travelers than some of the most highly traveled domestic routes, as can be seen when comparing the _____.

Highly Traveled Commercial Airline Routes in 2017–18

Location 1	Location 2	Distance (km)	2018 passengers	2017 passengers	Type
Hong Kong	Seoul-Incheon	2,080	3,081,942	3,198,132	international
Beijing	Shanghai-Hongqiao	1,081	6,518,997	6,833,684	domestic
Hong Kong	Bangkok-Suvar-nabhumi	1,694	3,490,988	3,438,628	international
Mexico City	Monterrey	729	3,474,971	3,202,091	domestic

Which choice most effectively uses data from the table to complete the example?

- (A) distance between Mexico City and Monterrey with the distance between Hong Kong and Bang-

kok-Suvarnabhumi.

- (B) number of passengers who traveled between Beijing and Shanghai-Hongqiao in 2017 with the number who traveled between Hong Kong and Seoul-Incheon during that same year.
- (C) number of passengers who traveled between Hong Kong and Bangkok-Suvarnabhumi in 2018 with the number who traveled between Mexico City and Monterrey during that same year.
- (D) number of passengers who traveled between Hong Kong and Bangkok-Suvarnabhumi in 2017 with the number who traveled that same route in 2018.

13. Chondrite meteorites recovered on Earth tend to show negligible concentrations of sodium-rich evaporites. Following collection in space and return to Earth in controlled nitrogen environments with extremely low (1%) humidity, material from the asteroid Bennu—which shares compositional features with a chondrite subclass—was found to have significant sodium evaporite concentrations. After five months in Earth air at 30%–40% humidity (lower-than-average humidity for most nondesert Earth locations), a small sample of Bennu material showed significant evaporite deterioration and new compound formation; after eight months in similar conditions, another sample experienced complete loss of sodium evaporites. Together, these observations suggest that _____.

Which choice most logically completes the text?

- (A) sodium-rich evaporites are scarce on recovered chondrites in part due to the length of time those chondrites have been exposed to much lower humidity levels than those typically found on Earth.
- (B) the sodium evaporite concentrations on Bennu may have once been similar to those on recovered chondrites, but exposure to Earth's atmospheric humidity affected Bennu's evaporites and led to new compound formation.
- (C) the nitrogen storage environment in which the Bennu material was transported may have facilitated the formation of sodium-rich evaporites that then deteriorated when exposed to atmospheric humidity typical of most nondesert locations on Earth.
- (D) the discrepancy between sodium evaporite concentrations on recovered chondrites and those initially observed on the Bennu material may be attributable to the chondrites' exposure to atmospheric humidity typical of many Earth environments.

14. In 2024, Marianne Dehasque et al. challenged earlier theories on causes of woolly mammoth extinction that emphasized isolation and inbreeding and a resulting increase in harmful genetic mutations. Focusing on Wrangel Island off the coast of Siberia, where the last mammoths lived, the team used genome-based simulations to evaluate mutations in the population there. The analysis showed that particularly damaging mutations became less frequent, while moderate ones accumulated over time within the isolated population, which quickly grew from about 8 founding individuals to the 200–300 individuals it maintained until its extinction. The team thus concluded that despite its isolation, the Wrangel Island mammoth population likely _____.

Which choice most logically completes the text?

- (A) developed increasing resistance to certain diseases and environmental harms over time.
- (B) didn't succumb as a result of the most harmful genetic mutations becoming too prevalent for the population to be sustained.
- (C) didn't go extinct suddenly but rather experienced a slow decline over its last several generations.
- (D) reached a size similar to that of nearby mammoth populations that were not isolated and thus had fewer genetic mutations.

15. With vast petroleum reserves, Saudi Arabia is the world's leading producer of crude oil, but the country's capacity to refine what it produces is surprisingly _____ country that imports nearly all its crude oil, Saudi Arabia refines only slightly more petroleum.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) modest—compared to peer nation South Korea—a
 - (B) modest. Compared to peer nation South Korea, a
 - (C) modest, compared to peer nation South Korea. A
 - (D) modest compared to peer nation South Korea, a
16. Paris Opera Ballet dancer Marie Camargo introduced a seemingly simple innovation to the ballet world of the 1730s by removing the heels from her dance shoes, creating the precursor to today's soft ballet slipper. This change was more than an aesthetic choice, _____ redesigned footwear enabled the execution of leaps and other more athletic movements that had been impossible in the traditional heeled ballet shoes.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) however her
 - (B) however. Her
 - (C) however and her
 - (D) however, her
17. While improvising, a guitarist may add expression without causing dissonance by swapping the bII^7 chord for its opposite, the VI^6 chord. This concept of harmonic opposites originated in the music theory text *A Theory of Harmony* (1985) by Ernst Levy. British musician Jacob Collier _____ Levy's concept and, in a 2017 YouTube interview that went viral among music theory enthusiasts, gave it the name "negative harmony."

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) has popularized
 - (B) would popularize
 - (C) had popularized
 - (D) popularized
18. Publisher Mary Katharine Goddard (1738–1816) played a crucial role in the United States' fight for independence. Her newspaper, the *Maryland Journal*, emerged as a powerful voice for the patriot cause in the 1770s, advocating against British rule and _____ revolutionary ideals.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) had popularized
 - (B) popularizes
 - (C) would popularize
 - (D) popularizing
19. With an average summer temperature of 82.5 degrees Fahrenheit, Nicosia is one European _____ many travelers recommend, especially from June to September.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) city, which

- (B) city in which
- (C) city that
- (D) city, that

20. With evidence of long-term use over centuries (a pattern rarely seen in early Caribbean sites) _____ conventional theories about highly mobile foraging groups, the Ortiz site is an example of what archaeologists call persistent placemaking.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) have challenged
- (B) has challenged
- (C) challenging
- (D) challenged

21. At Storm King Art Center, an outdoor sculpture park in New York, Alexander Liberman's *Adonai* is exposed to rain, snow, heat, and humidity. _____ it remains in good condition due to its material: Liberman's sculpture is made of corrosion-resistant steel.

Which choice completes the text with the most logical transition?

- (A) As a result,
- (B) In addition,
- (C) That said,
- (D) On the contrary,

22. Researchers' attempts to reintroduce the extinct toromiro tree to the Pacific island of Rapa Nui faced repeated failures despite the use of healthy seedlings and carefully chosen locations. _____ the researchers discovered that bacteria that the toromiro relied on to add nitrogen to the soil had also gone extinct, meaning that successful restoration would require reintroducing both the tree and its essential bacterial partners.

Which choice completes the text with the most logical transition?

- (A) Most notably among these efforts,
- (B) Similar to this project,
- (C) Upon closer investigation,
- (D) Despite these failures,

23. Some former Olympic demonstration events, like speed skating, were used to gauge the sport's popularity for future inclusion in the official Games, while others showcased lesser-known sports popular in that host country. _____ kyudo, a Japanese form of archery, may have lacked global name recognition, but it was an apt demonstration sport at the 1964 Summer Olympic Games in Tokyo, Japan.

Which choice completes the text with the most logical transition?

- (A) Moreover,
- (B) Conversely,
- (C) Similarly,
- (D) Indeed,

24. While researching a topic, a student has taken the following notes:

- The A.M. Turing Award is a prestigious award given for “major contributions of lasting importance to computing.”
- Peter Naur won the award in 2005 for contributions to the field of programming language design.
- Raj Reddy won the award in 1994 for pioneering the development of large-scale artificial intelligence systems.

The student wants to emphasize the order in which Peter Naur and Raj Reddy won the A.M. Turing Award. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- (A) Peter Naur and Raj Reddy both won the A.M. Turing Award, which is given for “major contributions of lasting importance to computing.”
- (B) In 2005, Peter Naur won the A.M. Turing Award for contributions to the field of programming language design.
- (C) Raj Reddy won the A.M. Turing Award in 1994; Peter Naur won it later, in 2005.
- (D) It was in 1994 that Raj Reddy won the A.M. Turing Award.

25. While researching a topic, a student has taken the following notes:

- The Shinkansen, commonly known as the bullet train, is a network of high-speed railways in Japan.
- 1960s: The trains’ high speeds created intense pressure waves that produced sonic booms when the trains exited tunnels.
- 1980s: Engineer Eiji Nakatsu noted that the kingfisher bird could dive into water at high speeds while barely creating a splash.
- The kingfisher’s beak gradually widens from tip to head, allowing the bird to transition smoothly between air and water.
- Nakatsu and the other engineers redesigned the train nose based on the kingfisher’s beak structure to improve the train’s transition between tunnel and open-air environments.
- The redesign reduced pressure buildup, eliminating sonic booms.

The student wants to explain how the kingfisher’s beak structure was used to solve the bullet train’s sonic boom problem. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- (A) The shape of the kingfisher’s beak inspired engineers to reshape the train nose into one that gradually widens, allowing the train to move smoothly between air and water.
- (B) Nakatsu’s observation of kingfishers diving into water showed how the bird’s beak structure could help the train eliminate sonic booms.
- (C) Nakatsu discovered that the kingfisher’s beak structure eliminated sonic booms, and the redesign improved the train’s transition between tunnel and open-air environments.
- (D) By redesigning the train’s nose to imitate the kingfisher’s gradually widening beak shape, engineers improved the train’s transition between tunnels and open air, eliminating sonic booms.

26. While researching a topic, a student has taken the following notes:

- India Arie is an African American singer and songwriter.
- The media outlet All Music has described her music as having “glistening acoustic guitar, churchy organ, and smooth, supple beats.”
- Her first studio album, *Acoustic Soul*, was released in 2001.
- It features the song “Always in My Head.”
- Ralph Rolle played drums on the album.

Which choice most effectively uses information from the given sentences to introduce *Acoustic Soul* to an audience already familiar with India Arie?

- (A) India Arie’s music has been described as having “glistening acoustic guitar, churchy organ, and smooth, supple beats.”
- (B) Featuring the song “Always in My Head,” *Acoustic Soul* is India Arie’s first studio album.
- (C) Ralph Rolle played drums on singer and songwriter India Arie’s 2001 album, *Acoustic Soul*.
- (D) “Always in My Head,” a song by singer and songwriter India Arie, is featured on the album *Acoustic Soul*.

27. While researching a topic, a student has taken the following notes:

- Since 1931, the *New York Times* (NYT) Best Sellers list has been a measure of the most successful books in the US.
- Margot Lee Shetterly and Tayari Jones are Black authors who have reached the NYT Best Sellers list.
- *Hidden Figures* is a nonfiction book by Margot Lee Shetterly.
- It reached the NYT Best Sellers list on January 29, 2017.
- *An American Marriage* is a novel by Tayari Jones.
- It reached the NYT Best Sellers list on February 6, 2018.

Which choice most effectively uses information from the given sentences to emphasize the different years in which the books reached the NYT Best Sellers list?

- (A) Margot Lee Shetterly and Tayari Jones are both NYT best-selling authors.
- (B) The nonfiction book *Hidden Figures* became an NYT best seller in 2017; *An American Marriage*, a novel, joined this list as well, but in 2018.
- (C) *Hidden Figures* and *An American Marriage* are both books by Black authors that have reached the NYT Best Sellers list.
- (D) Margot Lee Shetterly’s *Hidden Figures* and Tayari Jones’s *An American Marriage* are both NYT best sellers, but the former is a nonfiction book, whereas the latter is a novel.

4 Math — Module 1

22 ta savol · 35 daqiqa

1. What is the radius of the circle in the xy -plane defined by $(x + 2)^2 + (y + 6)^2 = 289$?

JAVOB:

2. $x^2 + 22x = -121$

What is the solution to the given equation?

- (A) -22
(B) -121
(C) 11
(D) -11

3. At what point (x, y) do the graphs of the equations $y = 9$ and $y = -2x + 7$ intersect in the xy -plane?

- (A) $(9, -2)$
(B) $(-1, 9)$
(C) $(9, 9)$
(D) $(9, 7)$

15. A researcher agitated a quantity of milk inside a graduated beaker, which produced foam on the surface of the milk. The predicted height, in centimeters (cm), of the foam can be modeled by the function $f(t) = 3.90(0.80)^t$, where t is the time, in minutes, after the milk was agitated. Which of the following is the best interpretation of the statement “ $f(0.40)$ is approximately 3.7” in this context?

- (A) 0.40 minutes after the milk was agitated, the predicted height of the foam is approximately 3.7 cm.
- (B) 0.40 minutes after the milk was agitated, the predicted height of the foam has decreased by approximately 3.7 cm.
- (C) 3.7 minutes after the milk was agitated, the predicted height of the foam is approximately 0.40 cm.
- (D) 3.7 minutes after the milk was agitated, the predicted height of the foam has decreased by approximately 0.40 cm.
16. What is the x -intercept of the graph of $y = \frac{28 - x}{ax + b}$ in the xy -plane, where a and b are positive constants?

- (A) $(28, 0)$
- (B) $\left(-\frac{b}{a}, 0\right)$
- (C) $(0, -28)$
- (D) $\left(0, \frac{28}{b}\right)$
17. In the xy -plane, line k passes through the points $(6, 5)$ and $(7, 11)$ and is defined by the equation $y = mx + b$. What is the value of b ?

JAVOB:

5 Math — Module 2

22 ta savol · 35 daqiqa

- 1.** If $2(6t - 25) + t = 40 + 7t$, what is the value of $6t$?

JAVOB:

2.

x	y
-12	74
-6	50
6	2
12	-22

The table shows four values of x and their corresponding values of y . There is a linear relationship between x and y . Which of the following equations represents this relationship?

- (A) $24x + 6y = 26$
(B) $24x + 6y = 156$
(C) $6x + 24y = 26$
(D) $6x + 24y = 156$

3.
$$\begin{aligned} x + 2y &= -4 \\ 2x - y &= 22 \end{aligned}$$

The solution to the given system of equations is (x, y) . What is the value of $x - 3y$?

JAVOB:

10. $y = -\frac{1}{9}(x + 18)(x^2 - 25)$

In the xy -plane, the graph of the given equation contains the point (s, t) . If $-5 \leq s \leq 5$, which of the following is NOT a possible value of t ?

- (A) 18
- (B) 5
- (C) 0
- (D) -5

11. An isosceles right triangle has a hypotenuse of length 42 inches. What is the perimeter, in inches, of this triangle?

- (A) $21\sqrt{2}$
- (B) $42\sqrt{2}$
- (C) $42 + 42\sqrt{2}$
- (D) $42 + 84\sqrt{2}$

12. For the linear function f , $f(4) = 13$ and $f(8) = 5$. Which equation defines f ?

- (A) $f(x) = -\frac{1}{2}x + 15$
- (B) $f(x) = \frac{1}{2}x + 11$
- (C) $f(x) = -2x + 17$
- (D) $f(x) = -2x + 21$

13. $x^2 - 14x + y^2 + 20y = 20$

In the xy -plane, the graph of the given equation is a circle. What is the length of the circle's diameter?

(A) 10

(B) 26

(C) 40

(D) 169

14. Right circular cylinder A is similar to right circular cylinder B , where the ratio of the diameter of cylinder A to the diameter of cylinder B is 3 to 4. The height of cylinder A is equal to its diameter. If the surface area of cylinder A is 216π square inches, what is the volume, in cubic inches, of cylinder B ?

(A) $1,024\pi$

(B) 768π

(C) 432π

(D) 384π

15. $f(x) = 5x^2 + 90x + 406$

The function g is defined by $g(x) = f(x + 6)$. What is the minimum value of $g(x)$?

(A) -15

(B) -9

(C) 1

(D) 7

22.
$$\begin{cases} y < -4x \\ y \geq 45 \end{cases}$$

There are three points $(-12, n)$, where n is an integer, that are solutions to the given system of inequalities in the xy -plane. Which table represents these three points?

(A)

x	y
-12	45
-12	46
-12	48

(B)

x	y
-12	45
-12	47
-12	48

(C)

x	y
-12	45
-12	46
-12	47

(D)

x	y
-12	46
-12	47
-12	48

8 Izohlar — R&W Module 1

Har bir javob — matndagi dalil bilan

1. **B — evaluate.** Duradgor rot-resistant yog'ochni *tanlashi* uchun avval variantlarni *baholashi* kerak. *Sustain* (qo'llab-quvvatlamok) va *conceal* (yashirmok) mantiqqa to'g'ri kelmaydi.
2. **D — pranks.** Matn boshida ular "hoaxes perpetrated as *jokes*" deb atalgan ⇒ soxta maqolalar oxiri *hazil* (prank) sifatida aniqlangan.
3. **C — vulnerability.** Ikki nuqtadan keyingi izoh: ta'minot zanjiri "highly *fragile*" ⇒ bog'liqlik ishlab chiqaruvchilar uchun *zaiflik*. *Insolvency* (bankrotlik) haqida gap yo'q.
4. **A — nominal.** Tadqiqot oil shock ta'siri "fairly *modest*", faqat "slightly negative" ekanini ko'rsatgan. "Merely nominal" (arzimas) deyish esa *oshib yuborish* bo'lardi. *Detrimental* (zararli) "merely" bilan mos kelmaydi.
5. **A.** Avval cone hujayralari va ularning turlari tasvirlanadi, keyin Fong jamoasining medium cone'larni faollashtirgan tadqiqoti aytiladi. D noto'g'ri: olio rangi faqat oxirida tilga olinadi.
6. **B.** Trueba avvalgi bog'liqlikni topmagan va buni tushuntiradi: tadqiqot faqat iqlimi o'xshash rain-forest yashash joylari bilan cheklangan. C juda kuchli: "cannot be observed" deb isbotlanmagan; D "invalidated" — xato.
7. **D.** Text 2: "lack of characterization is *central to Asimov's thematic aims*" ⇒ bu uslub ongli tanlov bo'lib, "individuals don't matter" g'oyasini yetkazadi.
8. **C.** "Hidden" — ko'pchilik sezmaydi; bioblitz kuzatuvlari "relationships that might otherwise *remain unseen*" ni ochib beradi ⇒ tizimli kuzatuvsiz ko'rinmaydi. Tun yoki kamuflyaj haqida gap yo'q.
9. **A.** Central Valley changida stronsiy nisbati *pastroq*. Uning ulushi past joyda (San Joaquin) o'zgarmagan ⇒ nisbat doimiy; balandlikda (Providence, Soaproot) ortgan ⇒ nisbat *kamaygan*.
10. **C.** Da'vo: zamonaviy usullar 1882 yildan ancha oldingi ildizga ega. Hohokam tizimi — 7-asr, printsiplari "still utilized by today's engineers". D esa 20-asr oxiri — keyinroq.
11. **A — mute swan.** Kerakli misol: *uchadigan* va 1 kg dan ancha og'ir qush. Mute swan: 11.9 kg, "Yes". Ostrich uchmaydi; condor 11.3 kg, "below 10 kg" emas.
12. **B — CrystalShine.** Shart: yorug'lik 15% dan ko'p o'tishi va glare maksimal kamayishi. CrystalShine: 18% va 71% — shart ichidagi eng yuqori. GoldBlock faqat 6% o'tkazadi.
13. **B.** "Much of the novel is *pure invention*" ⇒ faqat hayotiy o'xshashliklarga e'tibor bergan o'quvchi Céline'ning *ijodkorligini* sezmay qoladi. C teskari: ular real materialni haddan tashqari ko'radi.
14. **B.** Mellaart aholini "dense clusters" binolar zichligidan hisoblagan. Yangi ma'lumot: binolar qisqa muddat yashalgan yoki omborga aylangan ⇒ bino zichligi aholi sonining ishonchli ko'rsatkichi emas.
15. **A — goal: catching** Ikki nuqta "ultimate goal" nima ekanini tushuntiradi. "Catching..." mustaqil gap emas, shuning uchun nuqta-vergul (C) va nuqta (D) xato; vergul (B) esa aniq izohni bermaydi.
16. **A — distinguished.** Gapning egasi "the performer", lekin asosiy fe'l yo'q. *Distinguishing* va *to distinguish* fe'l emas (fragment); *distinguish* esa birlik egaga mos emas.

17. **B — Americans who won elections** Bu yerda oddiy ko'plik kerak, egalik emas ⇒ apostrof ishlatilmaydi.
18. **C. “Having 13,199 feet of prominence”** — tog'ga tegishli, shuning uchun vergulidan keyin darhol *Mount Rainier* kelishi kerak. A, B, D — dangling modifier (geographers/list/ranking prominence'ga ega emas).
19. **A — is to realize** “To experience...” — birlik ega, asosiy fe'l kerak: “To experience X is to realize Y”. B ko'plik fe'l; C va D fe'lsiz — fragment.
20. **C. “Represented by a double vertical bar”** — *caesura*ga tegishli, shuning uchun vergulidan keyin “the caesura” kelishi shart. A, B, D — dangling modifier (name, Latin word, etymology).
21. **A — To be exact**, Munosabat: *aniqlashtirish*. “First half of the twentieth century” ⇒ aniqrog'i 1913–1915. Zidlik yoki ketma-ketlik yo'q.
22. **A — For instance**, Munosabat: *misol*. “Various specialized tools” ⇒ misol uchun barometr va anemometr.
23. **C — Later**, Munosabat: *vaqt ketma-ketligi*. 1965 yildagi birinchi strip ⇒ keyinroq 1991 va 1995 yillardagi striplar. *Previously* vaqtni teskari qiladi.
24. **A — Indeed**, Munosabat: *tasdiqlash/kengaytirish*. Oldingi gap: suv texnika samarasini pasaytiradi; keyingi gap buni batafsil tushuntiradi (suv radar energiyasini yutadi). Zidlik emas, natija ham emas.
25. **B. Maqsad — farq**. B “timelines don't match” deb farqni aytadi va misol keltiradi (7-oy Gregorian 3-oyida boshlanadi). A va C faqat bitta kalendarni tasvirlaydi.
26. **D. Maqsad — Stevens va Christie o'rtasidagi o'xshashlik**: ikkalasining asari yaqinda public domain'ga o'tgan. A “unlike” va C “however” farqni ta'kidlaydi.
27. **B. Savol Forever and a Day** dagi rolni aniqlashni so'raydi: “played the role of *Marjorie Ismay*”. D filmni tilga oladi, lekin rolni aytmaydi.

9 Izohlar — R&W Module 2

Har bir javob — matndagi dalil bilan

1. **C — differentiated from**. To'q ko'k suv atrofdagi och ko'k sayoz joylardan oson *ajralib turadi*, shuning uchun qayiqchilar ularni topgan. “surpassed” yoki “explored” rang farqi mantig'iga mos emas.
2. **C — evacuating**. Keyingi gap: gazlar, namlik va chiqindilar liniyadan *purged* qilinmasa, tizim buziladi ⇒ liniyani *bo'shatish/tozalash* kerak.
3. **C — corrective**: Avval Appalachian balladalari faqat Britaniya musiqasining nusxasi deb qaralgan. Yangi tadqiqotlar mahalliy yangiliklar va spirituallar ta'sirini tan olib, bu xato qarashni *tuzatadi*.
4. **C — accommodates**. Katta quvurlar, ochiq ulanish joylari va klapanlar kelajakdagi o'zgarishlarga *moslashish* imkonini beradi, ya'ni dizayn bu ehtimolni *hisobga oladi*.
5. **B. Matn muzlatkich** paydo bo'lgach odamlar ovqatni qanday saqlagani va natijada “shop ... less frequently” — xarid odatlari o'zgargani haqida. Sog'liq, fan yoki ko'nikma yo'qolishi haqida gap yo'q.

6. **D.** Tagi chizilgan qism koreografiya (uslublarni aralashtirish) nimadan *ilhomlanganini* — Barnes'ning qiziqishini aytadi, ya'ni sabab/motivatsiya. Lindy Hop boshqalardan kuchliroq degan da'vo yo'q (B).
7. **C.** Text 2: ko'p tadqiqotlar tamoyilni tasdiqlaydi, lekin ular kichik, tez ko'payadigan o'ljalarga oid; bug'ular uchun ishlamagan $\Rightarrow$ tamoyilning dalili bor, ammo *hamma holatga* tegishli emas.
8. **B.** Jack: yomg'ir yog'masa ham, Bartley "some cause of complaining" topish uchun boshiga teshik chelak kiyardi $\Rightarrow$ Bartley har qanday vaziyatdan *nusson topadi*.
9. **D.** Sharqiy Afrika matolaridan arab xattotligigacha ta'sirlar va "constant evolution", hech qanday qat'iy dasturga bog'lanmaslik $\Rightarrow$ tajribaga ochiq, bitta ramkaga cheklanmaydi. Tanqidchilar yoki an'anaga ikkilanish haqida matnda gap yo'q.
10. **B.** "my favourites, the great woods ... It makes my heart bleed" — o'rmonlarga kuchli *hissiy bog'liqlikni* bevosita ko'rsatadi. A faqat tasvir, C faoliyat, D o'zini tanishtirish.
11. **B.** Display bor turlarda inkubatsiya qisqa (13, 15 kun), yo'q turlarda uzun (28, 29); parental incubators esa ikkala guruhda 1 va 2 $\Rightarrow$ bog'liq emas. Qisqa inkubatsiya ko'proq brood imkonini beradi. A va D jadvalga teskari.
12. **C.** 2018: Hong Kong–Bangkok (xalqaro) 3,490,988 yo'lovchi, Mexico City–Monterrey (ichki) esa 3,474,971 $\Rightarrow$ xalqaro yo'nalish ichkidan ko'proq tashigan. B da ichki yo'nalish ko'proq, A esa masofa.
13. **D.** Bennu materiali quruq muhitda evaporitlarga boy edi, Yer havosidagi namlikda (30–40%) esa ular yo'qoldi $\Rightarrow$ Yerdagi xondritlarda evaporit kamligi Yer namligi ta'siri bo'lishi mumkin. A "much lower humidity" deydi — teskari.
14. **B.** Tahlil: eng zararli mutatsiyalar *kamaygan*, populyatsiya 200–300 da barqaror bo'lgan $\Rightarrow$ yo'q bo'lish sababi zararli mutatsiyalar ko'payishi emas. Kasallikka chidamlilik yoki sekin kamayish haqida dalil yo'q.
15. **B — modest. Compared to** "capacity ... is surprisingly modest" — to'liq gap. Keyingi mustaqil gap "Saudi Arabia refines ..." uchun nuqta kerak. A va D — run-on, C da "A country ..." fragment.
16. **B — however. Her** "This change was more than an aesthetic choice, however" — to'liq gap; "Her redesigned footwear enabled ..." — yana mustaqil gap. Vergul bilan (D) — comma splice, A va C — run-on.
17. **D — popularized.** Fe'l "gave it the name" (past simple) bilan parallel va 2017 yildagi aniq o'tgan voqea. "had popularized" 2017 dan oldingi harakatni bildirib, mantiqni buzadi.
18. **D — popularizing.** "advocating against British rule *and popularizing* revolutionary ideals" — ikkala -ing shakl parallel. Boshqa variantlar mustaqil fe'l bo'lib, parallelizmni buzadi.
19. **C — city that.** "many travelers recommend" qaysi shaharligini aniqlaydi (restrictive) $\Rightarrow$ vergulsiz *that*. "in which" ma'noni buzadi, "that" esa noto'g'ri.
20. **C — challenging.** "With evidence ... *challenging* conventional theories" — *with* + ot + -ing iborasi; asosiy gap "the Ortiz site is ...". A/B gapda ikkinchi asosiy fe'l yaratadi, D esa dalil o'zi e'tiroz qilingan degan ma'no beradi.
21. **C — That said,** Haykal yomg'ir, qor, issiqqa *duchor bo'ladi*, shunga qaramay yaxshi holatda qolgan — zid kutilma (qarama-qarshilik). "As a result" mantiqan xato: ob-havo yaxshi holatning sababi emas.

22. **C — Upon closer investigation**, Muvaffaqiyatsizliklar $\Rightarrow$ chuqurroq o'rganib, sababni (bakteriyalar ham yo'q bo'lgan) topishgan. "Despite these failures" mos emas: kashfiyot muvaffaqiyatsizliklarga qarshi emas, balki ularni tushuntiradi.
23. **D — Indeed**, Oldingi gap: ba'zi namoyish sportlari mezbon mamlakatda mashhur sportlarni ko'rsatgan. Kyudo — aynan shunga misol, ya'ni fikrni *tasdiqlaydi*. "Conversely" zidlik, "Similarly" o'xshashlik bildiradi.
24. **C**. Maqsad — *tartib*: "Raj Reddy ... in 1994; Peter Naur won it *later*, in 2005." B va D faqat bitta odamni aytadi, A esa yillarni bermaydi.
25. **D**. Qanday hal qilinganini to'liq aytadi: tumshuq shaklini (asta kengayuvchi) takrorlash $\Rightarrow$ tunnel va ochiq havo o'rtasida silliq o'tish $\Rightarrow$ sonic boom yo'qoldi. A da poyezd "air and water" orasida harakatlanadi — xato.
26. **B**. Tinglovchi India Arie'ni biladi, shuning uchun uni tanishtirish shart emas; *albomni* tanishtirish kerak: "Acoustic Soul is India Arie's first studio album." C barabanchiga, D qo'shiqqa urg'u beradi.
27. **B**. Maqsad — turli yillar: *Hidden Figures* 2017 da, *An American Marriage* "but in 2018". A va C yil aytmaydi, D janr farqini ta'kidlaydi.
