1. **Reading & Writing Module 1** — 27 savol, 32 daqiqa. Vaqt tugagach to'xtang.
2. **Reading & Writing Module 2** — 27 savol, 32 daqiqa.
3. **Math Module 1** — 22 savol, 35 daqiqa. **Math Module 2** — 22 savol, 35 daqiqa. R&W va Math orasida 10 daqiqa tanaffus. Desmos kalkulyatoridan foydalanish mumkin.
4. **JAVOB** katakchasi turgan Math savolida variant yo'q — javobni o'zingiz yozasiz.
5. **Javobga hamma modulni tugatgandan keyin qarang.**
6. **Xato qilgan savolni Xatolar daftariga yozing** va uch kundan keyin qayta yeching.

Har bir R&W modul — real SAT tartibida

Craft & Structure (Words in Context, Text Structure, Cross-Text) → **Information & Ideas** (Central Ideas, Command of Evidence, Inferences) → **Standard English Conventions** → **Expression of Ideas** (Transitions, Rhetorical Synthesis).

Math modullari Algebra, Advanced Math, Problem Solving & Data Analysis va Geometry & Trigonometry savollaridan iborat; savollar osondan qiyinga qarab joylashgan.

2 Reading & Writing — Module 1

27 ta savol · 32 daqiqa

1. By eliminating middlemen, direct-to-consumer sales channels allow small farms to capture retail prices rather than accept lower wholesale rates. The pricing advantages that come with adopting this model, combined with the customer loyalty that comes from forging personal connections, can _____ the financial outlook for many small agricultural producers.

Which choice completes the text with the most logical and precise word or phrase?

- (A) transform
- (B) hasten
- (C) overshadow
- (D) interpret

2. Whatever the general attitude toward William Greaves’s 1968 film *Symbiopsychotaxiplasm: Take One* and Spike Lee’s 1992 film *Malcolm X* when they were initially released, both films now tend to be regarded quite _____. In 2018, for example, critics for the *New York Times* praised the former as “a vital artifact of its time” and the latter as “electrifying.”

Which choice completes the text with the most logical and precise word or phrase?

- (A) skeptically
- (B) neutrally
- (C) favorably
- (D) strangely

3. Accounts known as popular microhistories tell sweeping, century-spanning stories of ordinary objects like coffee and pigments. _____ this approach with that of traditional microhistories, which undertake painstaking historical reconstructions of singular incidents, may seem unlikely, but both are guided by the idea that seemingly inconsequential subjects can reveal larger historical processes in surprising ways.

Which choice completes the text with the most logical and precise word or phrase?

- (A) Contrasting
- (B) Supplanting
- (C) Reconciling
- (D) Instituting

4. The Pacific halibut is an ectothermic (cold-blooded) fish, whereas the albacore tuna is a regional endotherm; unlike that of ectotherms, its body temperature remains above the ambient water temperature. The basking shark had been classified as a full endotherm, but researchers Haley R. Dolton et al. found that its body temperature remains 1.0 to 1.5 °C above ambient, which is _____ that classification.

Which choice completes the text with the most logical and precise word or phrase?

- (A) indicative of
- (B) subordinate to
- (C) opportune for
- (D) incongruous with

5. Some psychologists such as Julia Rohrer are conducting projects that are meant to foster intellectual humility (the ability to realize that one is wrong and to publicly admit it) among scientific researchers. This is important: the scientific process is ideally self-correcting as new research either confirms or contradicts prior findings, but that process is slowed when researchers are unwilling to acknowledge that disputed work of theirs might have flaws. If embraced by scientists, intellectual humility therefore has the potential to increase the efficiency of scientific research.

Which choice best states the main purpose of the text?

- (A) To identify a particular mistake made by scientists in a research project
- (B) To cite specific examples of scientists who acknowledged flaws in their work
- (C) To explain how a specific project fosters intellectual humility
- (D) To describe the importance of intellectual humility to scientists

6. Positive expressive writing is self-reflective writing aimed at exploring positive topics and feelings like hopefulness. Techniques of positive expressive writing include one called “benefit finding,” which involves writing about positives that come from difficult experiences, and “satisfaction processes,” which involves writing in-depth about how certain experiences lead to feelings of fulfillment. In a large-scale analysis, Lauren Hout and colleagues determined that while different techniques produce varying outcomes, they all tend to have a more consistent effect on well-being and positive outlook than on physical health and stress.

Which choice best describes the overall structure of the text?

- (A) It introduces a study about positive expressive writing and then explains that the researchers are planning a follow-up study.
- (B) It gives an overview of positive expressive writing and then states a research finding about this type of writing.
- (C) It identifies several positive emotions and then asserts that positive expressive writing should be done daily to amplify those emotions.
- (D) It describes one popular technique of positive expressive writing and then names the techniques researchers have found to be most useful.

7. **Text 1**

For decades, ornithologists assumed that if they saw a singing Bell’s vireo—a bird species found in temperate North America—they must be observing a male trying to attract a mate or claim territory. As Peter J.B. Slater and Nigel I. Mann have emphasized, however, a similar assumption can’t be made about birds in the tropics, where females sing as often as males do. Slater and Mann call for more research on this discrepancy between tropical and temperate female birdsong.

Text 2

Recent evidence shows that a female Bell’s vireo is as capable of song as a male is. In fact, female birdsong is more common among temperate species than currently assumed, claim Evangeline Rose and colleagues. These female songbirds sing less frequently than males do, and in duller tones, making it “easy for researchers to miss the quiet and hidden females and focus on the loud and colorful males,” says Rose.

Based on the texts, how would Rose and colleagues (Text 2) most likely respond to the assertion by Slater and Mann (Text 1) about the different prevalence of female birdsong in temperate and tropical areas?

- (A) They would raise the possibility that the difference in prevalence may be due to differences in the timing of the mating season among temperate and tropical bird species.
- (B) They would argue that the apparent difference in prevalence may partly reflect a difference in

the ease with which female birdsong and male birdsong can be detected.

(C) They would caution that the seeming difference in prevalence may be an artifact of researchers' tendency to study birdsong among temperate species more frequently than among tropical species.

(D) They would concede that the geographic difference in prevalence is real but argue that the frequency with which male tropical birds sing has been overstated by previous researchers.

8. Devon A. Mihesuah is a novelist and a citizen of the Choctaw Nation of Oklahoma. Critics and fellow writers have praised her work for combining traditional Choctaw stories with popular genres of literature, such as mystery fiction. But Mihesuah is not the only Indigenous writer to blend traditional stories with popular literature. In the 2020 novel *The Only Good Indians*, Stephen Graham Jones successfully blended the oral storytelling tradition of his tribe, the Blackfeet Nation, with horror fiction.

Which choice best states the main idea of the text?

(A) Recent Indigenous fiction writers are mixing traditional stories with popular literary genres.

(B) Several famous Indigenous writers increased their book sales when they began incorporating traditional stories.

(C) Non-Indigenous authors should consider the expectations of Indigenous readers.

(D) The success of Devon A. Mihesuah has influenced non-Indigenous authors who write in popular literary genres.

9. High-reward flowers that produce nectar with relatively high sugar concentrations are thought to be especially attractive to scaly-breasted hummingbirds and other hummingbird species. But when María A. Maglianesí and team monitored hummingbird visits to flowering plants, including *Heliconia irrasa*, at Los Cusingos Bird Sanctuary and other sites in Costa Rica, they found that visit frequencies weren't influenced by nectar traits. Rather, physical compatibility of flower corollas (collections of petals) and hummingbird bills more strongly predicted hummingbird-plant interaction patterns.

Which statement about hummingbird preferences is most strongly supported by the text?

(A) Hummingbirds' preferences are primarily driven by trait-matching between their bills and flower corollas, though nectar qualities are a secondary factor driving their preferences.

(B) Hummingbirds consistently prefer plant species whose flowers have physical traits that are compatible with their bills but offer relatively low nectar rewards.

(C) A floral trait found to influence which plant species hummingbirds prefer may result in certain hummingbird species visiting flowers with relatively low nectar rewards over those with higher nectar rewards.

(D) Physical compatibility between flower corollas and hummingbird bills becomes an important factor that influences hummingbird preferences when hummingbirds are uncertain about which plants produce high-reward nectar.

10. A film studies student is researching early 20th-century film serials, which consisted of individual episodes of a single long story that were shown weekly in theaters. *The Shadow of the Eagle* is a 1932 serial that, over its 12 episodes, kept its audience interested with the suspense and drama that are typical of the crime genre. The student, however, claims that ultimately audiences of the time preferred resolution and closure over ongoing tension.

Which finding, if true, would most directly support the student's claim?

(A) Audiences of the time considered *The Shadow of the Eagle* to belong to a genre other than the crime genre.

(B) The 12th episode of *The Shadow of the Eagle* was the most expensive episode of the series to produce.

- (C) Modern critics generally regard the first episode as the best installment of *The Shadow of the Eagle*.
- (D) The 12th episode of *The Shadow of the Eagle* was viewed by more people than was any previous episode in the series.

11. Narratives of American revolutionary history often imply that the US Declaration of Independence (published in 1776) was a document that specifically resulted from the presumably exceptional nature of the soon-to-be United States—in this interpretation, the Declaration is a singular instrument born from a response to injustice that was intended to announce the birth of a new kind of nation and win foreign allies to that nation’s cause. But this interpretation neglects to place the Declaration in the larger context of eighteenth-century Western political philosophy—the Declaration was only one of several significant works published during 1776, a remarkable year for political thought.

Which statement, if true, would most strongly support the claim in the underlined portion?

- (A) Newspapers in 1776 were often read aloud in public places, ensuring that even those who did not read newspapers themselves could still knowledgeably participate in political discussions.
- (B) In late 1776, Benjamin Franklin traveled to France to seek French support for the American cause, eventually leading to France providing both military and financial aid to the Americans.
- (C) George Campbell’s *The Philosophy of Rhetoric*, a highly influential attempt to develop a foundational theory of how humans communicate, was published in 1776.
- (D) In 1776, the English historian Edward Gibbon began publishing *The History of the Decline and Fall of the Roman Empire*, a work whose novel theories of empire collapse proved politically influential.
12. A student is writing an essay about how writers of the late 1700s responded to the French Revolution and wants to include two pieces of textual evidence that show closely aligned attitudes toward the revolution. The student has selected the following quotation, adapted from Helen Maria Williams’s 1791 poem “A Farewell, for Two Years, to England”:

*In new-born majesty [France] seems to rise,
While sudden from the land oppression flies.
So, at the solemn hour of Nature’s birth,
When brooding darkness veil’d the beauteous earth,
Heaven’s awful mandate pierc’d the solid night,
“Let there be light,” it said, “and there was light!”*

Which quotation from another prominent writer of the same period would be most effective for the student to include along with the quotation from Williams’s poem?

- (A) “The age of chivalry is gone. That of sophisters, economists, and calculators has succeeded; and the glory of Europe is extinguished forever.” (Edmund Burke)
- (B) “Let human nature, conscious of its own infirmities, humbly solicit the protection of Omnipotence against the arrogance of human Reason, whenever, proud of her own supremacy, she presumes to pass the interdicted bounds prescribed to her finite powers.” (Jane West)
- (C) “[Liberty] scorns to disdain / Her righteous cause with carnage, and resigns / To Fraud and Anarchy the infuriate crowd.” (Charlotte Smith)
- (D) “Reason has, at last, shown her captivating face, beaming with benevolence; and it will be impossible for the dark hand of despotism again to obscure its radiance.” (Mary Wollstonecraft)

13. Humans are overwhelmingly right-hand dominant (85–90%) and can thus be said to exhibit strong population-level right-handedness (PLRH). Among studies of nonhuman primates, William C. McGrew’s 1988 study of captive gorillas purported to show PLRH, while McGrew and colleagues’ 1999 study of wild chimpanzees did not. Overall, the studies claiming PLRH in nonhuman primates find much lower incidences of right-handedness than humans exhibit, but it’s worth noting that studies of captive primates tend to show significantly greater incidences of right-handedness than studies of wild primates do, therefore raising the possibility that _____.

Which choice most logically completes the text?

- (A) the apparent discrepancy between the studies’ results may be partly attributable to the 1988 study using different criteria when assessing hand dominance than were used in the 1999 study.
 - (B) the greater exposure to humans among the captive gorillas induced them to acquire more right-handed behaviors.
 - (C) the number of individuals in the study of wild chimpanzees is insufficient to preclude the claim that nonhuman primates exhibit PLRH.
 - (D) the number of individuals in the study of captive gorillas is insufficient for a robust claim regarding evidence of PLRH.
14. The *Lex Licinia sumptuaria* of 103 BCE was one in a succession of ancient Roman sumptuary laws governing expenditures on luxury, primarily regulating ceremonial processions and other lavish events. Such laws, enacted against a backdrop of anxiety about social dynamism, were intended to limit aspirational overreaching for status but were infrequently enforced. Moreover, enforcement was generally limited to fines, which, when levied against high-profile offenders, were widely announced. The affluent accepted fines as a tax on privilege, even as the amounts increased with frequent revisions to the laws. Historians have therefore argued that enforcing sumptuary laws only minimally may have been a way to avoid undermining the laws’ aims, given that _____.

Which choice most logically completes the text?

- (A) the public announcement of fines could signal offenders’ wealth and status, placing enforcement of the laws in conflict with their intent.
 - (B) the few fines that were imposed under the laws were tolerable to wealthy offenders and thus did not help the laws serve their intended purpose.
 - (C) authorities focused enforcement on the wealthiest offenders, recognizing that pursuing offenders who were unable to pay the fines could weaken fines’ effectiveness as a deterrent.
 - (D) less-affluent citizens were reluctant to risk incurring a fine and thus voluntarily complied with the laws even in the absence of regular enforcement.
15. The four-minute mile had long seemed an unbreakable barrier in distance running, but after Roger Bannister shattered it in 1954, his achievement was quickly surpassed by others. John Landy lowered the mark to 3:58.0 just six weeks after Bannister’s historic 3:59.4 _____. Derek Ibbotson broke Landy’s record with a time of 3:57.2 in 1957.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) run, for instance, while
- (B) run, for instance;
- (C) run. For instance, while
- (D) run; for instance,

16. When studying the concrete used to build ancient Roman structures, MIT researcher Admir Masic analyzed small white mineral features, otherwise known as lime clasts, embedded in the concrete. _____ analysis led Masic to determine the lime clasts, which previous researchers had dismissed as mixing errors, were evidence of an intentional “hot mixing” process that gives the concrete remarkable self-healing properties.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) This
- (B) All
- (C) Those
- (D) These

17. Mary Elizabeth Banning was a self-taught mycologist, or fungi specialist, who researched mushrooms in the late 1800s. Banning documented her findings in *The Fungi of Maryland*, an unpublished manuscript consisting of 175 watercolor _____ a detailed portrait of a particular species, such as *Polyporus betulae*, a fungi species of the order Hymenomycetes presented on plate 118.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) plates, each
- (B) plates, each was
- (C) plates. Each
- (D) plates; each being

18. In 1840, Rowland Hill’s penny postage system revolutionized mail in Britain, rendering obsolete previous systems in which senders paid variable rates based on distance traveled and recipients often refused delivery to avoid owing postage. Following _____ lead came similar systems implemented by reformers in other nations, such as Wilhelm Näff in Switzerland and José Clemente Pereira in Brazil.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) their
- (B) they’re
- (C) its
- (D) it’s

19. A recipient of the Robert A. Welch Award and the Priestley Medal from the American Chemical Society, _____ known as femtochemistry when he devised an optical spectroscopy technique that allowed researchers to study ultrafast chemical reactions occurring within molecules.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) the limits of measurability were expanded by chemist Ahmed Zewail who
- (B) the introduction of a new scientific discipline by chemist Ahmed Zewail
- (C) chemist Ahmed Zewail expanded the limits of measurability and introduced a new scientific discipline
- (D) the result of chemist Ahmed Zewail’s expansion of the limits of measurability was the introduction of a new scientific discipline

20. Walter De Maria's *Earth Room* installations in Germany and New York are notable examples of interior earth _____ former appearing in Munich and Darmstadt as temporary exhibits during the 1970s and the latter becoming a permanent fixture in Manhattan in the 1980s. *The New York Earth Room* consists of 280,000 pounds of soil spread across 3,600 square feet of gallery space.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) sculpture. The
- (B) sculpture the
- (C) sculpture, as the
- (D) sculpture, the

21. In a 2005 study by Sandoval et al., the researchers' aim was to analyze the diet composition of elk and mule deer in New Mexico. _____ they aimed to analyze the ratio of three different plant subtypes within these animals' diet: graminoids, forbs, and browse.

Which choice completes the text with the most logical transition?

- (A) Instead,
- (B) All the same,
- (C) Therefore,
- (D) Specifically,

22. Every US state has an associated state soil, which is typically selected by a group of experts, then passed through the state legislature to receive its official designation. For example, Nebraska's Holdrege soil was formally designated in 1979, and Michigan's Kalkaska soil in 1990. _____ years pass between a soil's selection and official designation, as the legislative process can be notoriously slow.

Which choice completes the text with the most logical transition?

- (A) Similarly,
- (B) In many cases,
- (C) Therefore,
- (D) Indeed,

23. In a 1998 study by Smith et al., the researchers used microhistological (fecal) analysis to determine the ratio of three plant subtypes (graminoids, forbs, and browse) within the diets of North American ungulates. The researchers did not perform this analysis on all such ungulates, _____ they focused exclusively on pronghorns and wild horses in New Mexico.

Which choice completes the text with the most logical transition?

- (A) regardless;
- (B) for instance;
- (C) however;
- (D) in other words;

24. While researching a topic, a student has taken the following notes:

- Sea anemones look like plants but are animals.
- Sea anemones stay in one place most of their lives.
- Corals look like plants but are animals.
- Corals build hard structures where they live.

The student wants to say how sea anemones and corals are the same. Which choice best uses information from the notes to do this?

- (A) Both sea anemones and corals build hard structures where they live.
- (B) Both sea anemones and corals stay in one place most of their lives.
- (C) Both sea anemones and corals look like plants but are animals.
- (D) Both sea anemones and corals are types of plants.

25. While researching a topic, a student has taken the following notes:

- The World Food Prize is awarded annually for contributions toward improving the world food supply.
- Maria Andrade is a Cape Verdean food scientist who was awarded the prize in 2016.
- Andrade was awarded the prize with three researchers who worked alongside her.
- Andrade's group developed biofortified breeds of sweet potato plants.
- Akinwumi Adesina is a Nigerian economist who was awarded the prize in 2017.
- He spearheaded economic initiatives promoting African agricultural infrastructure.

The student wants to emphasize a similarity between Andrade and Adesina. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- (A) Andrade won the World Food Prize in 2016 for her work with biofortified sweet potato plants, as did Adesina, a Nigerian economist.
- (B) Andrade, a food scientist and World Food Prize winner, has made scientific advancements with sweet potato plants, while Adesina, an economist, has promoted African agricultural infrastructure.
- (C) Though one is a food scientist and the other an economist, Andrade and Adesina have both been recognized with World Food Prizes for contributions toward improving the world food supply.
- (D) A Cape Verdean food scientist, Andrade won the World Food Prize in 2016; in 2017, however, the annual prize was awarded to a Nigerian economist—Adesina.

26. While researching a topic, a student has taken the following notes:

- The A.M. Turing Award is a prestigious award given for “major contributions of lasting importance to computing.”
- Shafi Goldwasser won the award in 2012 for transformative work that laid the foundations for digital cryptography.
- Maurice Wilkes won the award in 1967 for creating the first computer with an internally stored program.

The student wants to emphasize the order in which Shafi Goldwasser and Maurice Wilkes won the A.M. Turing Award. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- (A) Shafi Goldwasser and Maurice Wilkes both won the A.M. Turing Award, which is given for “major contributions of lasting importance to computing.”
- (B) It was in 1967 that Maurice Wilkes won the A.M. Turing Award.

(C) Maurice Wilkes won the A.M. Turing Award in 1967; Shafi Goldwasser won it later, in 2012.

(D) In 2012, Shafi Goldwasser won the A.M. Turing Award for transformative work that laid the foundations for digital cryptography.

27. While researching a topic, a student has taken the following notes:

- Since 1931, the *New York Times* (NYT) Best Sellers list has been a measure of the most successful books in the US.
- Lalita Tademy and Ta-Nehisi Coates are Black authors who have reached the NYT Best Sellers list.
- *Cane River* is a novel by Lalita Tademy.
- It reached the NYT Best Sellers list in 2001.
- *Between the World and Me* is a nonfiction book by Ta-Nehisi Coates.
- It reached the NYT Best Sellers list in 2015.

Which choice most effectively uses information from the given sentences to emphasize the different years in which the books reached the NYT Best Sellers list?

(A) Lalita Tademy's *Cane River* and Ta-Nehisi Coates's *Between the World and Me* are both NYT best sellers, but the former is a novel, whereas the latter is a nonfiction book.

(B) Lalita Tademy and Ta-Nehisi Coates are both NYT best-selling authors.

(C) *Cane River* and *Between the World and Me* are both books by Black authors that have reached the NYT Best Sellers list.

(D) The novel *Cane River* became an NYT best seller in 2001; *Between the World and Me*, a nonfiction book, joined this list as well, but in 2015.

3 Reading & Writing — Module 2

27 ta savol · 32 daqiqa

1. The following text is adapted from John Mathew’s 1925 short story “Tog.”
The fog extended its tentacles over city and river, gradually obliterating traces of familiar landscapes. At five thirty the old Panhandle bridge, supported by massive sandstone pillars, stalwart, as when erected fifty years before to serve a generation now passed behind the portals of life, had become a spectral outline against the sky.
As used in the text, what does the word “traces” most nearly mean?
 - (A) Recollections
 - (B) Debris
 - (C) Indications
 - (D) Copies
2. *Sazanami (Ripples)* is an important work of Nihonga, or classical Japanese painting. Unlike Asai Chū, who adopted traditional European methods such as painting with oil on canvas, Fukuda Heihachirō _____ traditional Japanese approaches. For instance, Fukuda produced *Sazanami* by applying color and platinum to a silk surface.
Which choice completes the text with the most logical and precise word or phrase?
 - (A) adhered to
 - (B) awarded
 - (C) reprimanded
 - (D) refrained from
3. The presumptive functionality of khipu, the semiotic system of knotted cords once used by the Inka, to encode language (perhaps, like ancient Chinese script, in units of discrete words) now has an empirical basis: Manuel Medrano’s statistical data on Spanish translations of khipu content, as recited by Quechua-speaking scribes, _____ historical reports of khipu’s status as a linguistic record.
Which choice completes the text with the most logical and precise word or phrase?
 - (A) replicate
 - (B) complicate
 - (C) supersede
 - (D) supplement
4. Although the cumulative weight of the goods in a cargo truck affects fuel efficiency, this effect—and the corresponding effect on the cost of a given trip to the trucking company—is relatively small. The large majority of a trip’s cost stems from the mere fact of the truck being on the road; accordingly, trucking firms are _____ to dispatch trucks that aren’t full.
Which choice completes the text with the most logical and precise word or phrase?
 - (A) admonished
 - (B) entitled
 - (C) loath
 - (D) prone

5. The following text is adapted from J.M. Barrie’s 1911 novel *Peter Pan*.

[Children] soon know that they will grow up, and the way Wendy knew was this. One day when she was two years old she was playing in a garden, and she plucked another flower and ran with it to her mother. I suppose she must have looked rather delightful, for Mrs. Darling put her hand to her heart and cried, “Oh, why can’t you remain like this for ever!” This was all that passed between them on the subject, but henceforth Wendy knew that she must grow up.

Which choice best describes the overall structure of the text?

- (A) It states an assumption about children and then considers the ways in which Wendy differs from others.
 - (B) It makes a prediction about a future event involving Wendy and then supplies a reason for making that prediction.
 - (C) It makes a claim about children and then illustrates it with a description of Wendy’s experience.
 - (D) It presents a question about Wendy’s qualities and then answers that question in detail.
6. Marketing research recognizes three distinct types of price endings: round (like \$25.00), just-below (like \$24.99), and precise (like \$24.63). A number of studies have documented significant differences in how frequently these price endings appear in different countries’ marketplaces. Although these variations could be attributable to cultural factors, researchers have yet to thoroughly investigate that connection, and it remains unclear which cultural differences may be relevant or how they might interact with other socioeconomic conditions.

Which choice best states the main purpose of the text?

- (A) To analyze consumer purchasing behavior across different cultures
- (B) To contrast cultural and socioeconomic explanations for differences in price endings
- (C) To present the finding that three different pricing strategies are used broadly across cultures
- (D) To identify a research gap regarding potential cultural influences on price endings

7. **Text 1**

It’s clear that worldwide cooperation is needed to tackle global issues such as climate change. However, it hasn’t been clear how to foster strong group cohesion to motivate prosocial behavior at a global level given that humans tend to align more locally, from family to nationality. Evidence now shows that being prompted to consider the shared biology of all humans can cause individuals to identify more strongly with humanity overall, suggesting that emphasis on the “global family tree” may promote collective action.

Text 2

Perhaps counterintuitively, a focus on group distinctions can help ensure that responsibility for issues with global effects (e.g., natural resource depletion and climate change) is shared globally. For example, though young people don’t always view themselves as essential parties in such matters, reminders of their collective role as future inheritors of problems left unsolved can spark their engagement.

Which choice best describes a notable difference in focus between Text 1 and Text 2?

- (A) Both texts imply that global issues are equally relevant to all people living today, but Text 1 focuses on the idea that such issues will remain broadly relevant for the foreseeable future and Text 2 focuses on the idea that certain issues may soon become less relevant.
- (B) Both texts establish that people need to be made aware of the specific ways global issues are likely to affect them individually, but Text 1 focuses on the empathy those details inspire and Text 2 focuses on the obligation those details entail.
- (C) Both texts suggest that embracing commonalities can be beneficial when it comes to urging

people to collective action to address global issues, but Text 1 focuses on the broadest scope of connection and Text 2 focuses on connections more limited in scope.

(D) Both texts indicate that global issues should be addressed with large-scale shared efforts, but Text 1 focuses on the idea that it may be most effective to link global and local coordination and Text 2 focuses on the idea that local efforts sometimes divert attention from broader coordination.

8. The following text is adapted from Rupa Bajwa's 2004 novel *The Sari Shop*. Ramchand works as an assistant in a shop in Amritsar, India.

Even at ten in the morning, the bazaar was throbbing with activity. The halwai [baker] was already installed in front of the Mishthan Sweet Shop, pressing jalabi batter into squiggly shapes that floated and simmered in the oil in a big iron cauldron. All the shops had opened for the day and, Ramchand noted guiltily, all the shop assistants were already in place, trying to sell things with fixed, attentive smiles on their shiny, bathed faces.

Based on the text, what can most reasonably be inferred about Ramchand?

- (A) Ramchand is overwhelmed by a bazaar after seeing the chaos of other shop assistants selling goods.
- (B) Ramchand is enthusiastic about being at work after seeing shop assistants who are excited about their jobs.
- (C) Ramchand is remorseful about arriving to work later than other shop assistants he sees.
- (D) Ramchand is fascinated by frying jalabi batter while wandering to work as a shop assistant.

9. In 2005, Swedish researchers studying flawed choice recall devised an experiment in which participants were shown two photos of different faces and asked to select the one they found more attractive. The researchers appeared to give the participants the photo they had chosen, but in fact used sleight of hand to give them the photo of the person they had not chosen. Most participants accepted the swap and, when asked to explain their initial preference, gave justifications for having chosen the face in the photo they were given. Subsequent researchers have replicated this finding with other choices, including jam preferences.

Based on the text, why was the sleight-of-hand step an important part of the experiment?

- (A) It allowed the researchers to control for the possibility that some participants found the two faces roughly equally attractive.
- (B) It enabled the researchers to determine whether the thought processes involved in selecting which photo had the more attractive face was similar to the thought processes involved in selecting a preferred jam.
- (C) It helped the researchers test whether participants would embrace an outcome they thought was consistent with their own choices even when it was truly contradictory.
- (D) It allowed the researchers to measure the willingness of participants to change their positions when presented with persuasive counterarguments.

10. Australia's modern population of dingoes, an ancient lineage of canids, comprises two genetically distinct groups that inhabit different sides of the country (west and east). Many have attributed this divergence to the nearly 3,500-mile-long "dingo fence," a barrier installed to prevent access to livestock, that created a division of Australia into large southeast and northwest sections around 150 years ago. However, having analyzed DNA from ancient dingo specimens ranging from hundreds to thousands of years old, paleogeneticist Sally Wasef and colleagues reject that common explanation.

Which finding, if true, would most directly explain why Wasef and colleagues reject the common explanation presented in the text?

- (A) The continent-wide population structure of modern dingoes matches that of the dingoes that were present in Australia around 2,000 years ago.
- (B) Ancient dingoes quickly dispersed throughout Australia after being introduced in two independent waves from distinct source populations at least 3,000 years ago.
- (C) The two earliest known sets of skeletal dingo remains in Australia date to around 3,400 years ago at a site in the west and around 3,300 years ago at a site in the east.
- (D) New Guinea singing dogs, a closely related species, began interbreeding with dingoes in south-east Australia 2,200–2,600 years ago and with dingoes in northwest Australia in the same period.
11. A restaurant is installing window film to create a more comfortable indoor atmosphere. This is because during dinner service, the sunlight gets in people's eyes while they eat. The restaurant owner wants to reduce the glare but still let customers enjoy the sunset. To help meet these goals, a window-film technician recommends selecting a film that reduces glare as much as possible while still allowing more than 15% of visible light to pass through the windows. The table shows the performance data for several different films.

Film name	Visible light allowed through	Glare reduction
No film used	90%	14%
GlowGuard	33%	52%
ShieldView	22%	65%
BronzeShine	16%	77%
ShadeBlock	7%	82%

Based on the window-film technician's recommendation and the data in the table, which film should the restaurant owner choose?

- (A) BronzeShine
- (B) ShieldView
- (C) ShadeBlock
- (D) GlowGuard
12. While the Netherlands, Turkey, and France are established leaders in the global goat dairy industry, countries like Belgium and Malaysia have smaller but growing goat dairy sectors. Seeking the feeding system that will give her the greatest profit, a Belgian farmer consults research published in 2018 by the Institut de l'Élevage (French Livestock Institute) comparing the economic indicators of different feeding systems on French goat farms.

Economic Indicators of Goat Farms in France by Feeding System in 2018

Feeding system	Milk per goat per year (kg)	Milk revenue (€) per goat	Feeding cost (€) per goat	Gross margin (€) per goat
Grazing	705	480.8	152.9	364
Grass silage	830	566.1	179.3	427
Fresh forage	860	617.5	248.5	364
Corn silage	931	653.6	220.6	456

Gross margin refers to the profit after subtracting certain costs (e.g., feeding cost) from total revenue, which may include more than milk revenue.

Which consideration, if true, should make the farmer most hesitant to rely on what the table suggests is the most profitable feeding system?

- (A) The labor costs of grazing livestock in Belgium are likely comparable with those in France; however, farmland in Belgium that is suitable for grazing is scarcer and may be more expensive than in rural southern and central France, where many French goat farms are located.
- (B) If properly processed and stored under airtight conditions, corn silage can retain its quality for over a year; hence, feeding systems that use corn silage are assured of a consistent feed supply that is less vulnerable to weather conditions than are more traditional feeding systems, such as grazing.
- (C) Goats expend energy grazing and therefore tend to produce less milk than goats fed silage or fresh-cut grass; moreover, grazing goats' diets are heterogeneous and seasonally variable, so milk production could decline when the nutritional value of available vegetation is poor.
- (D) Corn silage is typically mixed with soybean meal; hence, the feeding cost associated with corn silage is likely to fluctuate with the global price of soybeans, a commodity that has historically been subject to significant year-over-year price volatility.

13. It is hard for publishers and printers to create very long books that balance the requirements of readability, durability, and cost. Among some exceptionally long novels published in English, Miguel de Cervantes's *Don Quixote* (translated from Spanish) was published in a 1,239-page edition and runs to an estimated 590,000 words, while Margaret Young's *Miss Macintosh, My Darling* (written originally in English) was published in a 1,198-page edition and runs to an estimated 750,000 words. This suggests that _____.

Which choice most logically completes the text?

- (A) readers will, on average, take the same time to read *Miss Macintosh, My Darling* as they will to read *Don Quixote*.
- (B) the edition of *Don Quixote* was less expensive to print than the edition of *Miss Macintosh, My Darling*.
- (C) the edition of *Miss Macintosh, My Darling* has more words per page than the edition of *Don Quixote*.
- (D) *Don Quixote* likely has a lower word count in its original Spanish edition.

14. Psychologist Lisa K. Fazio and colleagues presented participants with several series of images of an everyday object, progressing from blurry to clear, and asked participants to identify the object as soon as they confidently could (on average, at image 12 of 15). Participants were then asked to return to each series and recall at which point they were able to identify the image; on average, they selected image 10. This phenomenon—believing that one knew more in the past than one actually did—is known as hindsight bias. When participants were asked to estimate when a person who had not participated in the experiment would be able to identify the object, the average selection was again image 10. This finding suggests that _____.

Which choice most logically completes the text?

- (A) people tend to believe that they are less likely than their peers are to show hindsight bias.
- (B) being implicitly reminded of their earlier state of ignorance may enable people to reduce their hindsight bias.
- (C) a form of hindsight bias may occur even when it does not directly enable people to exaggerate their own past knowledge.
- (D) having their own hindsight bias explicitly pointed out to them may not prevent people from applying that same bias to their peers.

15. Drought-avoidance mechanisms—morphological adaptations that plants undergo when exposed to drought conditions—take a variety of forms. The soybean plant elongates its primary root to increase water _____ in the rosemary plant, drought triggers a decrease in the plant’s stalk length that limits water loss.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) uptake, for instance, while
- (B) uptake; for instance,
- (C) uptake. For instance, while
- (D) uptake, for instance,

16. The human face contains the levator palpebrae superioris, a skeletal muscle that is attached to the _____. This muscle plays a role in raising the upper eyelid.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) sphenoid;
- (B) sphenoid,
- (C) sphenoid that;
- (D) sphenoid

17. Contemporary adaptations of bonsai technique exhibit a global evolution of what was originally an East Asian tradition. The distinctive Filipino approach to mangrove styling _____ the unique ecological characteristics of the archipelago’s coastal forests, while Brazilian practitioners craft miniatures from fruiting pitanga trees local to their landscapes.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) will have reflected
- (B) reflects
- (C) reflected
- (D) had reflected

18. In 1909, children in the US were introduced to Billy Possum, a stuffed toy opossum named after the newly elected president, William Taft, _____ by the entrepreneur Susie Wright Allgood. Billy Possum was promoted as a replacement for the popular teddy bear, which was named for the previous president, Theodore Roosevelt.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) invent
- (B) is invented
- (C) invents
- (D) invented

19. The Huseby Klev archaeological site in Sweden was exceptionally well-preserved beneath a layer of clay, which sealed artifacts into what scientists describe as a natural geological time capsule. As a result, _____ and his colleagues were able to extract and analyze DNA from chewed tree resin dating back nearly 10,000 years.

Which choice completes the text so that it conforms to the conventions of Standard English?

- (A) paleogeneticist Emrah Kırdök

- (B) paleogeneticist, Emrah Kırdök
- (C) paleogeneticist Emrah Kırdök,
- (D) paleogeneticist, Emrah Kırdök,

20. The Larnaca Desalination Plant in Larnaca, Cyprus, uses reverse osmosis to produce fresh water from salt water. _____ this is not the only way to desalinate (remove salt from) water. The Yanbu Desalination Plant in Yanbu, Saudi Arabia, uses a method called multistage flash distillation.

Which choice completes the text with the most logical transition?

- (A) As a result,
- (B) Likewise,
- (C) However,
- (D) In other words,

21. Because of its bulky body, the world's first airplane, the 1903 Wright Flyer, was not very aerodynamic. Modern planes, like the Airbus A380 jet, have much sleeker, more streamlined bodies. _____ they are much more aerodynamic.

Which choice completes the text with the most logical transition?

- (A) On the contrary,
- (B) As a result,
- (C) Regardless,
- (D) Lastly,

22. As anthropologist Cristina Grasseni explains, many artisanal cheeses in Italy, such as Robiola di Roccaverano from Piedmont and Casatella Trevigiana from Veneto, are highly valued for their regional authenticity: _____ they are prized for being made using local ingredients and methods typical of their respective geographic regions.

Which choice completes the text with the most logical transition?

- (A) that is,
- (B) then,
- (C) rather,
- (D) still,

23. In biology there is no single agreed-upon concept of what defines a species; _____ numerous competing species concepts are used within the field, a dilemma known as the species problem. The biological species concept, described in 1942 by Mayr, defines species in accordance with reproductive isolation, while the phylogenetic species concept, delineated by Queiroz and Donoghue in 1988, organizes species according to monophyletic groups.

Which choice completes the text with the most logical transition?

- (A) in addition,
- (B) for instance,
- (C) as a result,
- (D) however,

24. While researching a topic, a student has taken the following notes:

- Louis Ballard was a classical composer and citizen of the Quapaw Tribe.
- His compositions synthesize Western classical music with elements of various Native musical traditions.
- Ballard's classical piece *Live On, Heart of My Nation* features a Choctaw hymn.
- Ballard's classical piece *Ritmo Indio* incorporates a Sioux flageolet, a traditional Native instrument.

The student wants to emphasize a similarity between the two classical compositions. Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) Ballard's works synthesize Western classical music and elements of various Native musical traditions; for example, the classical piece *Live On, Heart of My Nation* features a Choctaw hymn.

(B) Ballard's composition *Live On, Heart of My Nation* features a Choctaw hymn, while *Ritmo Indio* incorporates a Sioux flageolet.

(C) Ballard's *Live On, Heart of My Nation* features a Choctaw hymn, and *Ritmo Indio* incorporates a Sioux flageolet; as such, both synthesize Western classical music with elements of Native musical traditions.

(D) Ballard's compositions synthesize Western classical music with elements of various Native musical traditions, such as a Choctaw hymn.

25. A student is writing an essay on the subject of cultured meat, which is grown in a laboratory and is intended to help reduce the number of livestock harvested for food. The student wants to make the case that cultured meat production may be useful in responding to an expected widespread change in the public's behavior.

Which quotation from a publication by a researcher would most effectively support the student's claim?

(A) "Researchers who advocate for the development of lab-grown meat claim that it's better for the environment than conventional meat because it requires less water consumption."

(B) "The flavor of meat from livestock differs across species (from pig to chicken to cow), and is also influenced by farming conditions and the breeds and genders of animals."

(C) "A growing population that is including significantly more meat in its diet will contribute to an increasing demand for meat products in the 21st century."

(D) "Consumers tend to believe that using less packaging when selling meat products in stores would have a significant effect on the environment."

26. While researching a topic, a student has taken the following notes:

- Lighthouses send out crucial light signals to help ships and other watercraft navigate at night.
- Before automation, lighthouses were run by lighthouse keepers.
- Elizabeth Smith was the lighthouse keeper at Old Field Point Light in New York.
- She held this position from 1830 to 1856.
- Thelma Austin was the lighthouse keeper at Point Fermin Light in California.
- She held this position from 1925 to 1941.

The student wants to emphasize a difference between the two lighthouse keepers. Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) As the lighthouse keeper at Point Fermin Light, Thelma Austin helped watercraft navigate at night.

(B) Elizabeth Smith worked as a lighthouse keeper in an earlier century than did Thelma Austin.

- (C) Elizabeth Smith and Thelma Austin both played crucial roles in ensuring safe navigation for watercraft in past centuries.
- (D) From 1830 to 1856, the nighttime waters of New York were made more navigable thanks to Elizabeth Smith.

27. While researching a topic, a student has taken the following notes:

- The Highpointers Club is a hiking club.
- One of the main goals among club members is to reach the highest points in all fifty US states.
- Those who achieve this are called 50 Completes.
- In Suh Han became a 50 Complete on November 15, 2013.
- The highest point in Pennsylvania is Mount Davis, at 3,213 ft.
- The highest point in New Mexico is Wheeler Peak, at 13,167 ft.

Which choice most effectively uses information from the given sentences to explain the 50 Completes hiking challenge to a new audience?

- (A) If you are looking for a new hiking challenge, consider joining the Highpointers Club, as in Suh Han, a hiker who successfully reached the highest point in every US state.
- (B) On November 15, 2013, in Suh Han finally completed the feat of reaching the highest point in all fifty US states, including Mount Davis in Pennsylvania and Wheeler Peak in New Mexico.
- (C) Not until after you have reached the highest points in all fifty US states—including Mount Davis in Pennsylvania and Wheeler Peak in New Mexico—can you include yourself among the 50 Completes of the Highpointers Club.
- (D) Hikers aiming to count themselves among the 50 Completes must reach not only Pennsylvania's Mount Davis but also the even higher peak of Wheeler Peak in New Mexico.

4 Math — Module 1

22 ta savol · 35 daqiqa

1. A right square pyramid has a base with side lengths of 3 centimeters. The height of the pyramid is 12 centimeters. What is the volume, in cubic centimeters, of this pyramid?

- (A) 36
(B) 24
(C) 12
(D) 108

2. The distance d , in feet, from the ground to a flag on a flagpole t seconds after a person begins lowering it is given by the function $d(t) = 19 - 2t$. In this context, what does 19 represent?

- (A) The time, in seconds, it takes for the flag to be fully lowered
- (B) The distance, in feet, of the flag from the ground before it is lowered
- (C) The rate, in feet per second, at which the flag moves as it is lowered
- (D) The distance, in feet, of the flag from the ground 2 seconds after it begins lowering

3. Kaden owns a business that makes signs. The equation $t = 18s + 15$ gives the total time t , in minutes, it takes Kaden's business to make s signs. How long, in minutes, does it take Kaden's business to make 100 signs?

- (A) 3,300
(B) 1,518
(C) 1,815
(D) 1,800

(D) $\frac{1089}{4}$

10. A rectangle is inscribed in a circle such that the diagonal of the rectangle is twice the length of the shortest side of the rectangle. The area of the rectangle is $961\sqrt{3}$ square units. What is the length, in units, of the radius of the circle?

JAVOB:

11. The function f is defined by $f(x) = ax^2 + bx + c$, where a , b , and c are constants. The graph of $y = f(x)$ in the xy -plane passes through the points $(9, 0)$ and $(-5, 0)$. If a is an integer greater than 1, which of the following could be the value of $a + b$?

- (A) 5
(B) 4
(C) -3
(D) -6

12. An object's speed is increasing at a rate of 3.6 meters per second squared. What is this rate, in miles per minute squared, rounded to the nearest tenth? (Use 1 mile = 1,609 meters.)

- (A) 0.1
(B) 8.1
(C) 96.5
(D) 446.9

21. The function p is defined by $p(x) = a((x + 6)^2 - b)((x + 6)^2 - c)$, where a , b , and c are constants. In the xy -plane, the graph of $y = p(x)$ passes through the points $(-7, 42)$ and $(0, 812)$. What is the value of $p(-12) + p(-5)$?

JAVOB:

22. In 2005, Aster earned 14% more than in 2004, and in 2006 Aster earned 4% more than in 2005. If Aster earned y times as much in 2004 as in 2006, which of the following is closest to the value of y ?

- (A) 0.2857
- (B) 0.5600
- (C) 0.8435
- (D) 1.1856

Har bir javob — matndagi dalil bilan

1. **A — transform.** Narx ustunligi va mijoz sadoqati birgalikda fermerlarning moliyaviy holatini tubdan o'zgartira oladi. *Hasten* (tezlashtirmoq) “outlook” bilan mos kelmaydi.
2. **C — favorably.** Tanqidchilar filmlarni “a vital artifact” va “electrifying” deb *maqtagan* ⇒ ular hozir ijobiy baholanadi.
3. **C — Reconciling.** Ikki yondashuv farqli ko'rinadi, ammo “both are guided by the idea...” — umumiy g'oya ularni *murosaga keltirishga* imkon beradi. *Contrasting* esa “may seem unlikely” bilan zid.
4. **D — incongruous with.** Harorat atigi 1.0–1.5 °C yuqori — bu *regional* endotermga xos, *full* endoterm tasnifiga mos kelmaydi.
5. **D.** “This is important” — matn intellektual kamtarlik ilmiy jarayonni tezlashtirishini, ya'ni uning *ahamiyatini* tushuntiradi. Aniq loyiha (C) yoki misollar (B) berilmagan.
6. **B.** Avval positive expressive writing ta'rifi va texnikalari (umumiy tavsif), so'ng Hoult tadqiqotining *natijasi* beriladi. Keyingi tadqiqot (A) yoki “eng foydali” texnikalar (D) tilga olinmagan.
7. **B.** Rose: mo'tadil zonadagi urg'ochilar kamroq va “in duller tones” kuylaydi, shuning uchun “easy for researchers to miss” ⇒ farq qisman *aniqlash qiyinligidan* kelib chiqqan bo'lishi mumkin.
8. **A.** Mihsuah va Stephen Graham Jones — ikkalasi ham an'anaviy hikoyalarni mashhur janrlar (mystery, horror) bilan *aralashtiradi*. Sotuvlar (B) yoki non-Indigenous mualliflar (C, D) haqida gap yo'q.
9. **C.** Tashriflarga nektar emas, balki gultoj va tumshuq *mosliki* ta'sir qiladi ⇒ qush kam nektarli, lekin mos gulni tanlashi mumkin. A xato: nektar umuman ta'sir qilmagan (“weren't influenced”).
10. **D.** Da'vo: tomoshabinlar *yakunni* afzal ko'rgan. Oxirgi (12-) epizodni eng ko'p odam ko'rgan bo'lsa ⇒ yakunga qiziqish eng yuqori bo'lgan. B (xarajat) tomoshabin afzalligini ko'rsatmaydi.
11. **D.** Da'vo: 1776 yil *siyosiy* tafakkur uchun ajoyib yil bo'lgan. Gibbon asari 1776 da chiqib, “politically influential” bo'lgan. C (Campbell) muloqot nazariyasi haqida, siyosat haqida emas.
12. **D — Wollstonecraft.** Williams inqilobni zulmatdan keyingi *nur* sifatida ijobiy tasvirlaydi; Wollstonecraft ham “Reason...beaming” despotizm zulmatini yengadi deydi. A, B, C inqilobga salbiy munosabatda.
13. **B.** Asirlikdagi primatlarda o'naqaylik yovvoyilarga qaraganda ancha ko'p ⇒ farq asirlik sharoiti, ya'ni *odamlar bilan ko'proq muloqot* tufayli bo'lishi mumkin. A, C, D asirlik–yovvoyi farqini tushuntirmaydi.
14. **A.** Qonun maqsadi — maqomga intilishni cheklash. Jarimalar “widely announced” bo'lgan, boylar esa ularni “tax on privilege” deb qabul qilgan ⇒ e'lon qilingan jarima *boylik va maqom belgisiga* aylanib, qonun maqsadiga zid ishlaydi.
15. **A — run, for instance, while** “while” Ibbotson haqidagi qismni tobe gapga aylantiradi, bitta to'g'ri gap hosil bo'ladi. C: “For instance, while ... in 1957.” — asosiy gapsiz *fragment*. (B variant ham grammatik jihatdan xato emas — manbada variantlar noaniq.)
16. **A — This.** “analysis” birlikda ⇒ birlik ko'rsatish olmoshi *This* kerak. *Those, These, All* ko'plik bilan ishlatiladi.

17. **A — plates, each** “each a detailed portrait...” — fe’lsiz absolyut ibora, vergul bilan to’g’ri bog’lanadi. B: comma splice; C: “Each a detailed portrait” — fragment; D: nuqtali verguldan keyin fragment.
18. **C — its.** Olmosh birlikdagi “penny postage system”ga ishora qiladi va egalikni bildiradi (*its lead*). *Their* ko’plik; *it’s* = *it is*.
19. **C — chemist Ahmed Zewail expanded...** “A recipient of the...Award” kishini ta’riflaydi, shuning uchun gap egasi *Zewail* bo’lishi shart. A, B, D — dangling modifier (limits, introduction, result mukofot olmagan).
20. **D — sculpture, the** “the former appearing...and the latter becoming...” — fe’li *-ing* shaklidagi absolyut ibora, vergul bilan ulanadi. A: “The former appearing...” — fragment; B da tinish belgisi yo’q.
21. **D — Specifically,** Birinchi gap: umumiy maqsad (dieta tarkibi). Ikkinchi gap: uning *aniq* jihati (uch o’simlik turi nisbati) ⇒ aniqlashtirish.
22. **B — In many cases,** Qonunchilik jarayoni sekin bo’lgani uchun tanlash va rasmiylashtirish orasida *ko’p hollarda* yillar o’tadi. *Therefore* xato: oldingi misollar (1979, 1990) bu natijaga sabab emas.
23. **D — in other words;** “did not perform this analysis on all” ⇒ “focused exclusively on pronghorns and wild horses” — bir fikr boshqacha, aniqroq *qayta ifodalangan*. Zidlik yo’q, shuning uchun *however* to’g’ri kelmaydi.
24. **C.** Eslatmalarga ko’ra ikkalasi ham “look like plants but are animals”. A faqat marjonlarga, B faqat aktiniyalarga tegishli; D noto’g’ri — ular hayvon.
25. **C.** O’xshashlik: ikkalasi ham World Food Prize bilan *taqdirlangan*. A xato (Adesina batatda ishla-magan); B va D farqni ta’kidlaydi (*while, however*).
26. **C.** Faqat C ikkala yilni ko’rsatib, *tartibni* aniq beradi: Wilkes 1967 da, Goldwasser “later, in 2012”. B va D faqat bitta shaxs haqida.
27. **D.** Maqsad — *turli yillarni* ta’kidlash: *Cane River* 2001 da, *Between the World and Me* “but in 2015”. A janr farqini, B va C o’xshashlikni ko’rsatadi.

9

Izohlar — R&W Module 2

Har bir javob — matndagi dalil bilan

1. **C — Indications.** Tuman shahar va daryo ustini qoplab, tanish manzaralarning *belgilarini* (ko’rinib turgan izlarini) yo’q qilmoqda. “Recollections” (xotira) va “Debris” (chiqindi) bu yerda mos emas.
2. **A — adhered to.** “Unlike Asai Chū” — u Yevropa usullarini olgan, Fukuda esa aksincha an’anaviy yapon usullariga *sodiq qolgan*: ipakka rang va platina surtgan. “Refrained from” teskari ma’no beradi.
3. **D — supplement.** Endi “empirical basis” bor: Medrano’ning statistik ma’lumotlari tarixiy xabar-larni *to’ldiradi*, ya’ni ularga yangi dalil qo’shadi. “Complicate” va “supersede” xabarlarni rad etish/almashtirishni bildiradi.
4. **C — loath.** Yuk og’irligi xarajatga kam ta’sir qiladi, asosiy xarajat — yuk mashinasining yo’lda bo’lishi ⇒ firmalar to’lmagan mashinani jo’natishni *istamaydi*. “Prone” (moyil) teskari ma’no.

5. **C.** Avval umumiy da'vo: "Children soon know that they will grow up". Keyin Wendy misolida ko'rsatiladi: onasining so'zlaridan u ulg'ayishini bilib oldi.
6. **D.** Matn narx tugashlaridagi farqlar madaniyatga bog'liq bo'lishi mumkinligini aytib, "researchers have yet to thoroughly investigate" deydi $\Rightarrow$ tadqiqotdagi *bo'shliqni* ko'rsatadi.
7. **C.** Text 1: butun insoniyatning umumiy biologiyasi ("global family tree") — eng keng aloqa. Text 2: yoshlarning "collective role as future inheritors" — torroq guruh ichidagi umumiylik. Ikkalasi ham umumiylik jamoaviy harakatga undaydi.
8. **C.** "Ramchand noted *guiltily*, all the shop assistants were *already* in place" — u boshqalardan kech kelganidan o'zini aybdor his qilyapti.
9. **C.** Ishtirokchilarga tanlamagan rasmi berilgan, lekin ular buni o'z tanlovi deb qabul qilib, uni oqlagan $\Rightarrow$ usul odamlar haqiqatda zid natijani o'z tanlovi deb qabul qilishini tekshirgan. D dagi "counterarguments" matnda yo'q.
10. **A.** Umumiy tushuntirish: bo'linishga 150 yil oldingi "dingo fence" sabab. Agar hozirgi tuzilma 2000 yil oldingi dingolarnikiga mos kelsa, bo'linish devordan ancha oldin mavjud bo'lgan $\Rightarrow$ devor sabab emas.
11. **A — BronzeShine.** Shart: yorug'lik 15% dan ko'p, porlashni eng ko'p kamaytirsin. BronzeShine: 16% va 77% — eng yuqori. ShadeBlock 82%, lekin atigi 7% yorug'lik o'tkazadi.
12. **D.** Jadvalga ko'ra eng foydali tizim — corn silage (456 €). D: uning ozuqa xarajati soya narxining keskin o'zgarishiga bog'liq $\Rightarrow$ foyda barqaror emas. A va C grazing haqida, B esa corn silage'ni qo'llaydi.
13. **C.** *Miss Macintosh* kamroq sahifada (1,198) ko'proq so'zga (750,000) ega, *Don Quixote* esa 1,239 sahifada 590,000 so'z $\Rightarrow$ sahifadagi so'zlar soni ko'proq.
14. **C.** Ishtirokchilar boshqa odam ham 10-rasmda taniydi deb o'ylagan — bu o'z bilimni bo'rttirish emas, lekin baribir hindsight bias ko'rinishi. D noto'g'ri: bias ularga "explicitly pointed out" qilinishi aytilmagan.
15. **A — uptake, for instance, while.** Soya o'simligi — umumiy da'voga misol, "for instance" vergullar ichida. "While" ergash gapni bosh gapga bog'laydi. C: "While in the rosemary..." — fragment; D — comma splice.
16. **D — sphenoid.** "attached to the sphenoid" — to'ldiruvchi, undan keyin nuqta keladi. Tinish belgisi kerak emas; "that" esa gapni tugallanmagan qiladi.
17. **B — reflects.** Matn hozirgi zamonda: "exhibit", "craft" $\Rightarrow$ "approach ...reflects". Birlik ega (approach) — birlik fe'l.
18. **D — invented.** "a stuffed toy opossum named after ..., invented by ..." — o'tgan zamon sifatdoshi (participle) toyni tasvirlaydi. Boshqa variantlar gapda ikkinchi asosiy fe'l yaratib, uni buzadi.
19. **A — paleogeneticist Emrah Kırdök.** Kasb nomi ismdan oldin kelsa, vergul qo'yilmaydi. Ega ("Emrah Kırdök and his colleagues") bilan fe'l ("were able") orasida ham vergul bo'lmaydi.
20. **C — However.** Munosabat: *ziddlik*. Larnaca teskari osmos usulini qo'llaydi, *lekin* bu yagona usul emas: Yanbu boshqa usuldan foydalanadi.
21. **B — As a result.** Munosabat: *sabab–natija*. Zamonaviy samolyotlarning tanasi silliqroq $\Rightarrow$ shuning uchun ular aerodinamikroq.

22. **A — that is.** Munosabat: *izohlash*. “Regional authenticity” qayta tushuntiriladi: mahalliy ingredientlar va usullar bilan tayyorlangan.
23. **C — as a result.** Munosabat: *sabab–natija*. Turning yagona ta’rifi yo’q $\Rightarrow$ natijada ko’plab raqobatdosh tushunchalar qo’llaniladi.
24. **C.** Maqsad — ikki asarning *o’xshashligi*. C ikkalasini ham keltiradi va “both synthesize” deydi. B faqat farqni, A va D faqat bitta asarni ko’rsatadi.
25. **C.** Kutilayotgan keng xulq o’zgarishi: aholi ratsionga “significantly more meat” qo’shmoqda $\Rightarrow$ go’shtga talab oshadi, cultured meat bu talabga javob bo’lishi mumkin.
26. **B.** Maqsad — *farq*. Smith 19-asrda (1830–1856), Austin 20-asrda (1925–1941) ishlagan. C o’xshashlikni, A va D faqat bitta kishini ko’rsatadi.
27. **C.** Yangi auditoriyaga *challengeni* tushuntiradi: 50 shtatning eng baland nuqtalariga chiqsangiz, 50 Completes qatoriga kirasiz. B bitta odam haqida, D esa talabni faqat ikki cho’qqiga toraytiradi.

10 Xatolar daftari

Faqat xato qilgan savollarni yozing — aniq sabab bilan

Blok/#	Mening	To'g'ri	Nega xato qildim?	Qaysi qoida?
